SPECIAL TERMS AND CONDITIONS OF RATE CONTRACT

The tenders are invited for rate contract. The Contractor, who will not participate in the tender process will be treated that they are not interested in taking up the work and they will not be awarded the works of the above branches as mentioned in Annexure “B”.

2. The number of branches for ambience improvement are 11 Nos. (As per Annexure “B”). the work of the 11 branches under BHOPAL Module will be allotted to the participating contractors amount wise / priority wise as under :

- i. L-1 tenderers will be allotted 5 Nos. of branches.
- ii. L-2 tenderers will be allotted 3 Nos. of branches.
- iii. L-3 tenderers will be allotted 2 Nos. of branches.
- iv. L-4 tenderers will be allotted 1 Nos. of branches
- v. L-5 tenderers will be allotted 1 Nos. of branches
- vi. L-6 tenderers will be allotted 1 Nos. of branches
- vii. L-7 tenderers will be allotted 1 Nos. of branches

3. The efforts will be made to allot the Branches as per the above table as far as possible. However, SBIIMS has the discretion to change the distribution according to the size of branches and quantum of works involved, priority in work completion, etc. in the allotted branches. The decision of the SBIIMS is final & binding on all participating contractors.

4. The amount of work for the Branch will be arrived on the basis of the quantities worked out required for that Branch and rates of L1 contractor. Therefore, it will be the sole discretion of the SBIIMS to award the work accordingly to the contractors and no correspondence will be entertained in this regard.

5. The work of the branches will be awarded on the basis of the lowest quoted rates (L1 rates) to the contractors L1 to L4 as per the para 2 above.

6. The quoted rates shall be evaluated with respect to the estimated rates. If the quoted rates of L1 contractor found abnormally high/low or un-workable/unrealistic rates, it will be the sole discretion of the SBIIMS/ Bank to cancel the tenders. SBIIMS reserves the right to accept / reject any tender without assigning any reason.

7. The work of the Branches allotted to the contractors will not be more than three (3) at a time and after completion of all branches satisfactorily, next Branch will be allotted, if it is required to be given according to the para 2 above.

8. If any of L-2 & L-3, L-4, contractor, other than L1, who will not be willing to take up the work on rates of L1 contractor, then the branches of their scope will be allotted proportionately to the contractors in ascending order i.e. L-5, L-6, L-7 etc. by the SBIIMS/Bank.

9. While taking/executing the electrical work, the contractors shall comply the Indian Electricity Rule 1956, Indian Electricity Act 2003 and IS Code of all Electricity Operation & Safety Conduct.

10. The air-conditioning work shall also be got done through the authorized agency of the approved make with approval of SBIIMS. They shall also be required to submit the warranty card in the name of the BM of the concerned Branch.

11. The Contractor shall be responsible for any damages caused/ done due to accident during the progress of work.

12. Notwithstanding the above, the Contractor shall have to arrange for necessary Insurance cover that are imperative for the respective jobs and Premium thereof will have to be borne by the Contractor. SBIIMS/Bank shall not be bound to contest any claim made against it.

13. If the Contractor fails to start upon receiving (e-Mail) of written Work Order, does not undertake the work within the next 7 (seven) days or immediately as instructed in case of emergency, the SBIIMS/Bank shall have liberty to cancel the Work Order and employ other Contractor to get the works done.

14. In case, if the contractor discontinue or left incomplete the work then the SBIIMS/Bank reserve the right to cancel the work order and get the work done from the other contractor at his risk and cost. In such cases, the panel action for de-empanelling /blacklisting the contractors shall be initiated.

15. In case of exigencies, if the contractor refused to carry out the works on L-1 rates then next bidder shall be followed and so on.

16. The L-1 rates are valid for executing small quantum of work also, if required, among the empanelled contractors of BHOPAL Module / Bhopal Circle.

17. The no. of Branches is tentative and may be reduced or increased or changed/replaced with other Branch and the works shall be allotted accordingly based on the L-1 rates. Therefore, it will be the sole discretion of the SBIIMS to award the work to the contractors and no correspondence will be entertained in this regard.

18. The contractor handling five (5) Branches at present are advised not to participate in the tendering exercise, if then, tenders of those contractors shall be summarily rejected and any correspondence in this regard shall not be entertained by Bank/SBIIMS. The contractor handling 5 Branches at a time shall not be allowed for participation in further tendering exercise in the Bhopal Circle subject to completion of all allotted Branches satisfactorily.

Yours Faithfully,

**Vice President / Circle Head
Circle Office, Bhopal**

SAMPLE BUISNESS RULE DOCUMENT

ONLINE E-TENDERING FOR PROPOSED ELECTRICAL & AC WORKS AT VARIOUS BRANCHES, UNDER AO, BHOPAL

(A) Business rules for E-tendering:

1. Only empaneled contractors with SBIIMS PVT. LTD. under appropriate category who are invited by the project Architect/SBIIMS shall only be eligible to participate.
2. SBIIMS PVT.LTD. will engage the services of and E-tendering service provider who will provide necessary training and assistance before commencement of online bidding on Internet.
3. In case of e-tendering, SBIIMS will inform the vendor in writing, the details of service provider to enable them to contact and get trained.
4. Business rules like event date, closing and opening time etc. also will be communicated through service provider for compliance.
5. Contractors have to send by email, the compliance form in the prescribed format (provided by service provider), before start of E-tendering. Without this the vendor will not be eligible to participate in the event.
6. The Contractors will be required to submit the hard copy of EMD and proof of tender application copies in sealed Envelope to the office of SBI Infra Solutions Pvt Ltd. at the address mentioned hereinbefore by the stipulated date and time. Contractors not submitting any one or more documents shall not be eligible to participate in the on line price bidding.
7. E-tendering will be conducted on schedule date & time.
8. **The e-tendering will be treated as closed only when the bidding process gets closed in all respects for the item listed in the tender.**

(B) Terms & conditions of E-tendering:

SBIIMS PVT.LTD. shall finalize the Tender through e-tendering mode for which **M/s e-Procurement technologies Pvt Ltd, Ahemedabad** has been engaged by SBIIMS an authorized service provider. Please go through the guidelines given below and submit your acceptance to the same along with your Commercial Bid.

1. E-tendering shall be conducted by SBIIMS through **M/s e-Procurement technologies Pvt Ltd, Ahemedabad**, on pre-specified date. While the Contractors shall be quoting from their own offices/ place of their choice, Internet connectivity and other paraphernalia requirements shall have to be ensured by Contractors themselves. In the event of failure of their Internet connectivity, (due to any reason whatsoever it may be) it is the bidders' responsibility. In order to ward-off such contingent situation bidders are requested to make all the necessary arrangements/ alternatives such as back-up power supply whatever required so that they are able to circumvent such situation and still be able to participate in the E-tendering successfully. Failure of power at the premises of Contractors during the E-tendering cannot be the cause for not participating in the E-tendering. On account of this the time for the E-tendering cannot be extended and SBIIMS Pvt. Ltd. is not responsible for such eventualities.

2. **M/s e-Procurement technologies Pvt Ltd, Ahemedabad** shall arrange to train your nominated person(s), without any cost to you. They shall also explain you all the Rules related to the E-tendering. You are required to give your compliance on it before start of bid process.
3. BIDDING CURRENCY AND UNIT OF MEASUREMENT: Bidding will be conducted in Indian currency & Unit of Measurement will be displayed in Online E-tendering.
4. BID PRICE: The Bidder has to quote the rate as per the Tender Document provided by SBIIMS Pvt. Ltd. their appointed Architects.
5. VALIDITY OF BIDS: The Bid price shall be firm for a period specified in the tender document and shall not be subjected to any change whatsoever.
6. Procedure of E-tendering:
 - i. **Online E-tendering** :
 - (a) The hard copy of the Technical as well as Price Bid is available on the Bank's website during the period specified in the NIT.
 - (b) Online e-tendering is open to the empaneled bidders who receive NIT from the Architect and qualified for participating in the price bidding as provisions mentioned hereinabove through SBIIMS approved Service Provider.
 - (c) The Price-Bid shall be made available online by the Service Provider wherein the contractors will be required to fill-in their Item-wise rates for each item.
 - (d) The Contractors are advised not to wait till the last minute to submit their online item-wise quote in the price bid to avoid complications related with internet connectivity, network problems, system crash down, power failure, etc.
 - (e) It is mandatory to all the bidders participating in the price bid to quote their rates for each and every item.
 - (f) In case, contractor fails to quote their rates for any one or more tender items, their tender shall be treated as **"Incomplete Tender"** and shall be liable for rejection.
7. LOG IN NAME & PASSWORD: Each Bidder is assigned a Unique User Name & Password by **M/s e-Procurement technologies Pvt Ltd, Ahemedabad**. The Bidders are requested to change the Password after the receipt of initial Password from **M/s e-Procurement technologies Pvt Ltd, Ahemedabad**. All bids made from the Login ID given to the bidder will be deemed to have been made by the bidder.
8. BIDS PLACED BY BIDDER: Bids will be taken as an offer to execute the work as specified. Bids once made, cannot be cancelled / withdrawn and the Bidder shall be bound to execute the work at the quoted bid price. In case the L-1 Bidder backs out or fail to complete the work as per the rates quoted, SBIIMS shall at liberty to take action as deemed necessary including depaneling such contractors and forfeiting their EMD..
9. At the end of the E-tendering, SBIIMS Pvt. Ltd. will decide upon the winner. SBIIMS Pvt. Ltd. decision on award of Contract shall be final and binding on all the Bidders.
10. SBIIMS shall be at liberty to cancel the E-tendering process / tender at any time, before ordering, without assigning any reason.
11. SBIIMS shall not have any liability to bidders for any interruption or delay in access to the site irrespective of the cause.

12. Other terms and conditions shall be as per your techno-commercial offers and other correspondences till date.

13. OTHER TERMS & CONDITIONS:

- The Bidder shall not involve himself or any of his representatives in Price manipulation of any kind directly or indirectly by communicating with other suppliers / bidders.
- The Bidder shall not divulge either his Bids or any other exclusive details of SBIIMS Pvt. Ltd. to any other party.
- SBIIMS Pvt. Ltd. decision on award of Contract shall be final and binding on all the Bidders.
- SBIIMS Pvt. Ltd. reserve their rights to extend, reschedule or cancel any E-tendering within its sole discretion.
- SBIIMS or its authorized service provider **M/s e-Procurement technologies Pvt Ltd, Ahmedabad** shall not have any liability to Bidders for any interruption or delay in access to the site irrespective of the cause.
- SBIIMS or its authorized service provider **M/s e-Procurement technologies Pvt Ltd, Ahmedabad** is not responsible for any damages, including damages that result from, but are not limited to negligence.
- SBIIMS or its authorized service **M/s e-Procurement technologies Pvt Ltd, Ahmedabad** will not be held responsible for consequential damages, including but not limited to systems problems, inability to use the system, loss of electronic information etc.

N.B.

- All the Bidders are required to submit the Process Compliance Statement (Annexure II) duly signed to M/s. Antares Systems Limited.
- **All the bidders are requested to ensure that they have a valid digital signature certificate well in advance to participate in the online event.**

PROCESS COMPLIANCE STATEMENT (ANNEXURE II)

SECTION – 1**INSTRUCTIONS TO THE TENDERERS****1.0 Scope of work**

Sealed Tenders are invited by SBIIMS PVT.LTD. for the Electrical & AC works of AT VARIOUS BRANCHES, under AO, BHOPAL .

1.1 Site and its location

The proposed work is to be carried out at AT VARIOUS BRANCHES, under AO, BHOPAL , as mentioned in Annexure “B”.

2.0 Tender documents

- 2.1 The work has to be carried out strictly according to the conditions stipulated in the tender consisting of the following documents and the most workmen like manner.

Instructions to tenderers**General conditions of Contract****Special conditions of Contract****Additional specifications****Drawings****Priced bid A**

- 2.2 The above documents shall be taken as complementary and mutually explanatory of one another but in case of ambiguities or discrepancies, shall take precedence in the order given below;

- a) Price Bid
- b) Additional Specifications
- c) Technical specifications
- d) Drawings
- e) Special conditions of contract
- f) General conditions of contract
- g) Instructions to Tenderers

- 2.3 Complete set of tender documents including relative drawings can be downloaded from the website www.sbi.co.in

- 2.4 The tender documents are not transferable.

3.0 Site Visit

- 3.1 The tenderer must obtain himself on his own responsibility and his own expenses all information and data that may be required for the purpose of filling this tender document and enter into a contract for the satisfactory performance of the work. The tenderer is requested satisfy himself regarding the availability of water, power, transport and communication facilities, the character quality and quantity of the materials, labour, the law and order situation, climatic conditions local authorities requirement, traffic regulations etc;

The tenderer will be fully responsible for considering the financial effect of any or all the factors while submitting his tender.

4.0 **Earnest Money**

- 4.1 The tenderers are requested to submit the Earnest Money of **Rs. _____/- (_____ thousand only by means of Demand Draft / Pay Order** (Valid for a period of 180 Days from the last date of submission of the tender) from any scheduled Nationalized Bank drawn **in favour of SBI Infra Management Solutions Pvt. Ltd. and payable in Bhopal.**

- 4.2 EMD in any other form other than as specified above will not be accepted. Tender not accompanied by the EMD in accordance with clause 4.1 above shall be rejected.

- 4.3 No interest will be paid on the EMD.

- 4.4 EMD of unsuccessful tenderer will be refunded within 45 working Days of award of Contract.

- 4.5 EMD of successful tenderer will be retained as a part of security deposit.

5.0 **Initial/ Security Deposit**

The successful tenderer will have to submit a sum equivalent to 2% of accepted tender value less EMD by means of DD drawn in favour of SBIIMS Pvt. Ltd. within a period of 15 days of acceptance of tender.

6.0 **Security Deposit**

- 6.1 Total security deposit shall be 5% of contract value. Out of this 2% of contract value is in the form of Initial Security Deposit (ISD) which includes the EMD. Balance 3% shall be deducted from the running account bill of the work at the rate of 10% of the respective running account bill i.e., deduction from each running bill account will be @10% till Total Security Deposit (TSD) including ISD reaches to 5% of contract value. The 50% of the Total Security Deposit shall be paid to the contract on the basis of architect's certifying the virtual completion. The balance 50% would be paid to the contractors after the defects liability period as specified in the contract.

6.2 **Additional Security Deposit**

In case L-1 bidder quotes abnormally low rates (i.e. 10% or more, below estimated project cost), the bank may ask such bidder to deposit additional security deposit (ASD) equivalent to difference of estimated cost vis-à-vis L-1 quoted amount for due fulfillment of contract. Such ASD could be in the form of FDR / Bank's guarantee in the Bank's name as per format approved by the Bank. On successful completion of work ASD will be returned to the contractor. In case contractor fails to complete the work in time or as per tender specification or leave the job incomplete, the bank will be at

liberty to recover the dues from ASD or to forfeit such ASD as the case may be within its sole discretion.

6.3 No interest shall be paid to the amount retained by the Bank as Security Deposit.

7.0 **Signing of contract Documents**

The successful tenderer shall be bound to implement the contract by signing an agreement and conditions of contract attached herewith within 45 working Days from the receipt of intimation of acceptance of the tender by the Bank. However, the written acceptance of the tenders by the Bank will constitute a binding agreement between the Bank and successful tenderer whether such formal agreement is subsequently entered into or not.

8.0 **Completion Period**

Time is essence of the contract. The work should be completed in all respect accordance with the terms of contract within a period of 45 working Days from the date of award of work.

9.0 **Validity of tender**

Tenders shall remain valid and open for acceptance for a period of 90 days from the date of opening price bid. If the tenderer withdraws his/her offer during the value period or makes modifications in his/her original offer which are not acceptable to Bank without prejudice to any other right or remedy the Bank shall be at liberty forfeit the EMD.

10.0 **Liquidated Damages**

The liquidated damages shall be 0.50% per week subject to a maximum of 5% of contract value.

11.0 **Rate and prices:**

11.1 **In case of item rate tender**

11.1.1 The tenderers shall quote their rates for individual items both in words and figure. In case of discrepancy between the rate quoted in words and figures, the unit rate quantity in words will prevail. If no rate is quoted for a particular item the contractor shall not be paid for that item when it is executed.

The amount of each item shall be calculated and the requisite total is given. In case of discrepancy between the unit rate and the total amount calculated from multiplication of unit rate and the quantity the unit rate quoted will govern and the amount will be corrected.

11.1.2 The tenderers need not quote their rates for which no quantities have been given. In case the tenderers quote their rates for such items those rates will be ignored and will not be considered during execution.

11.1.3 The tenderers should not change the units as specified in the tender. If any unit is changed the tenders would be evaluated as per the original unit and the contractor would be paid accordingly.

The tenderer should not change or modify or delete the description of the item. If any discrepancy is observed he should immediately bring to the knowledge of the Architect/ SBIIMS Pvt. Ltd.

11.1.4 Each page of the BOQ shall be signed by the authorized person and cutting or overwriting shall be duly attested by him.

11.1.5 Each page shall be totaled and the grand total shall be given.

11.1.6 The rate quoted shall be firm and shall include all costs, allowances, taxes, levies.

11.1.7 The SBIIMS Pvt. Ltd. reserve their rights to accept any tenders, either in whole or in part or may entrust the work in phases or may drop the part scope of work at any stage of the project within its sole discretion without assigning any reason(s) for doing so and no claim / correspondence shall be entertained in this regard.

11.1.8 In case it is decided by the SBIIMS Pvt. Ltd. to drop one or more buildings from the scope of work at any stage of the project, the contractor shall not be entitled to raise any claim / compensation for such deleted scope of work. Also, the SBIIMS Pvt. Ltd. may consider issuing work order for various buildings in phases but within a reasonable time interval and the contractor shall be bound to execute the same within the stipulated time period and as per rates quoted by them in this tender without any claim for price escalation.

19.0 Works to be measured

The Architect/Consultant may from time to time intimate to the contractor that he require the work to be measured and the contractor shall forthwith attend or send a quantity representative to assist the Architect in taking such measurements and calculation and to furnish all particulars or to give all assistance required by any of them. Such measurements shall be taken in accordance with the Mode of measurements detail in the specifications. The representative of the Architect / Consultant shall take measurements with the contractor's representative and the measurements shall be entered in the measurement book. The contractor or his authorised representative shall sign all the pages of the measurement book in which the measurements have been recorded in token of his acceptance. All the corrections shall be duly attested by both representatives. No over writings shall be made in the M book should the contractor not attend or neglect or omit to depute his representative to take measurements the measurements recorded by the representative of the Architect / consultant shall be final. All authorized extra work, omissions and all variations made shall be included such measurement.

20.0 Variations

No alteration, omission or variation ordered in writing by the Architect / consultant vitiates the contract. In case the SBIIMS Pvt. Ltd. / Architect / Consultant thinks proper at any during the progress of works to make any alteration in, or additions to or omission from the works or any. alteration in the kind or quality of the materials to be used therein, the Architect / Consultant shall give notice thereof in writing to the contractor shall confirm in writing within seven days of giving such oral instructions the contract shall alter to, add to, or omit from as the case may be in accordance with such but the contractor shall not do any work extra to or make any alterations or additions to or omissions from the works or any deviation from any of the provisions of the contract, stipulations, specifications or contract drawings without previous consent in writing of

the Architect/ Consultant and the value of such extras, alterations, additions or omissions shall in all cases be determined by the Architect / Consultant and the same shall be added to or deducted from the contract value, as the case may be.

21.0 Valuation of Variations

No claim for an extra shall be allowed unless it shall have been executed under the authority of the Architect / Consultant with the concurrence of the SBIIMS Pvt. Ltd. as herein mentioned. Any such extra is herein referred to as authorized extra and shall be made in accordance with the following provisions.

- a)
 - (i) The net rates or prices in the contract shall determine the valuation of the extra work where such extra work is of similar character and executed under similar conditions as the work priced herein.
 - (ii) Rates for all items, wherever possible should be derived out of the rates given in the priced BOQ.
- b) The net prices of the original tender shall determine the value of the items omitted, provided if omissions do not vary the conditions under which any remaining items of Works are carried out, otherwise the prices for the same shall be valued under sub-Clause 'c' hereunder.
- c) Where the extra works are not of similar character and/or executed under similar conditions as aforesaid or where the omissions vary the conditions under which any remaining items or works are carried out, then the contractor shall within 7 days of the receipt of the letter of acceptance inform the Architect/ consultant of the rate which he intends to charge for such items of work, duly supported by analysis of the rate or rates claimed and the Architect/ consultant shall fix such rate or prices as in the circumstances in his opinion are reasonable and proper, based on the market rate.
- d) Where extra work cannot be properly measured or valued the contractor shall be allowed day work prices at the net rates stated in the tender, of the BOQ or, if not, so stated then in accordance with the local day work rates and wages for the district; provided that in either case, vouchers specifying the daily time (and if required by the Architect/Consultant) the workman's name and materials employed be delivered for verifications to the Architect /consultant at or before the end of the week following that in which the work has been executed.
- e) It is further clarified that for all such authorized extra items where rates cannot be derived from the tender, the Contractor shall submit rates duly supported by rate analysis worked on the 'market rate basis for material, labour hire / running charges of equipment and wastages etc. plus 15% towards establishment charges, contractor's overheads and profit. Such items shall, not be eligible for escalation.

22.0 Final measurement

The measurement and valuation in respect of the contract shall be completed within two months of the virtual completion of the work.

23.0 Virtual Completion Certificate (VCC)

On successful completion of entire works covered by the contract to the full satisfaction of the SBIIMS Pvt. Ltd., the contractor shall ensure that the following works have been completed the satisfaction of the SBIIMS Pvt. Ltd.:

- e) Shall hand over the work in a peaceful manner to the SBIIMS Pvt. Ltd.
- f) All defects / imperfections have been attended and rectified as pointed out by the Architects to the full satisfaction of SBIIMS Pvt. Ltd.

Upon the satisfactory fulfillment by the contractor as stated above, the contractor is entitled to apply to the Architect / consultant is satisfied of the completion of work. Relative to which the completion certificate has been sought, the Architect/ consultant shall within fourteen (14) days of the receipt of the application for completion certificate, issue a VCC in respect of the work for which the VCC has applied.

This issuance of a VCC shall not be without prejudice to the SBIIMS's rights and contractor liabilities under the contract including the contractor's liability for defects liability nor shall the issuance of VCC in respect of the works or work at any site be construction as a waiver of any right or claim of the SBIIMS Pvt. Ltd. against the contractor in respect of or work at the site and in respect of which the VCC has been issued.

24.0 Work by other agencies

The SBIIMS Pvt. Ltd. / Architect / consultant reserves the rights to use premises and any portion the site for execution of any work not included in the scope of this contract with may desire to have carried out by other persons simultaneously and the contractor shall not only allow but also extend reasonable facilities for the execution of such work. The contractor however shall not be required to provide any plant or material for the execution of such work except by special arrangement with the SBI. Such work shall be carried out in such manner as not to impede the progress of the works included in the contract.

25.0 Insurance of works

- 25.1 Without limiting his obligations and responsibilities under the contract the contractor shall insure in the joint names of the SBIIMS Pvt. Ltd. and the contractor against all loss of damages from whatever cause arising other than the excepted risks, for which he is responsible under the terms of contract and in such a manner that the SBIIMS Pvt. Ltd. and contractor are covered for the period stipulated I clause of GCC and are also covered during the period of maintenance for loss or damage arising from a cause, occurring prior to the commencement of the period of maintenance and for any loss or damage occasioned by the contractor in the course of any operations carried out by him for the purpose of complying with his obligations under clause.

- a) The Works for the time being executed to the estimated current Contract value thereof, or such additional sum as may be specified together with the materials for incorporation in the works at their replacement value.
- b) The constructional plant and other things brought on to the site by the contractor to the replacement value of such constructional plant and other things.
- c) Such insurance shall be effected with an insurer and in terms approved by the SBIIMS Pvt. Ltd. which approval shall not be unreasonably withheld and the contractor shall whenever required produce to the Architect / consultant the policy of insurance and the receipts for payment of the current premiums.

25.2 Damage to persons and property

The contractor shall, except if and so far as the contract provides otherwise indemnify the SBI against all losses and claims in respect of injuries or damages to any person or material or physical damage to any property whatsoever which may arise out of or in consequence of the execution and maintenance of the works and against all claims proceedings, damages, costs, charges and expenses whatsoever in respect of or in relation thereto except any compensation of damages for or with respect to:

- a) The permanent use or occupation of land by or any part thereof.
- b) The right of SBIIMS Pvt. Ltd. to execute the works or any part thereof on, over, under, in or through any lands.
- c) Injuries or damages to persons or properties which are unavoidable result of the execution or maintenance of the works in accordance with the contract
- d) Injuries or damage to persons or property resulting from any act or neglect of the SBIIMS Pvt. Ltd. their agents, employees or other contractors not being employed by the contractor or for or in respect of any claims, proceedings, damages, costs, charges and expenses in respect thereof or in relation thereto or where the injury or damage was contributed to by the contractor, his servants or agents such part of the compensation as may be just and equitable having regard to the extent of the responsibility of the SBIIMS Pvt. Ltd., their employees, or agents or other employees, or agents or other contractors for the damage or injury.

25.3 Contractor to indemnify SBIIMS Pvt. Ltd.

The contractor shall indemnify the SBIIMS Pvt. Ltd. against all claims, proceedings, damages, costs, charges and expenses in respect of the matters referred to in the provision sub-clause 25.2 of this clause.

25.4 Contractor's superintendence

The contractor shall fully indemnify and keep indemnified the SBIIMS Pvt. Ltd. against any action, claim, or proceeding relating to infringement or use of any patent or design or any alleged patent or design rights and shall pay any royalties which may be payable in respect of any article or part thereof included in the contract. In the event of any claim made under or action brought against SBIIMS Pvt. Ltd. in respect of such matters as aforesaid the contractor shall be immediately notified thereof and the contractor shall be at liberty, at his own expenses to settle any dispute or to conduct any litigation that may arise there from, provided that the contractor shall not be liable to indemnify the SBIIMS Pvt. Ltd. if the infringement of the patent or design or any

alleged patent or design right is the direct result of an order passed by the Architect / consultant in this behalf.

25.5 Third Party Insurance

25.5.1 Before commencing the execution of the work the contractor but without limiting his obligations and responsibilities under clause 24.0 of GCC shall insure against his liability for any material or physical damage, loss, or injury which may occur to any property including that of SBIIMS Pvt. Ltd., or to any person, including any employee of the SBIIMS Pvt. Ltd., by or arising out of the execution of the works or in the carrying out of the contract, otherwise than due to the matters referred to in the provision to clause 24.0 thereof.

25.5.2 Minimum amount of Third Party Insurance

Such insurance shall be affected with an insurer and in terms approved by the SBIIMS Pvt. Ltd. which approval shall not be reasonably withheld and for at least the amount stated below. The contractor shall, whenever required, produce to the Architect / consultant the policy or policies of insurance cover and receipts for payment of the current premiums.

25.6 The minimum insurance cover for physical property, injury, and death is Rs.5 Lakh per occurrence with the number of occurrences limited to four. After each occurrence contractor will pay additional premium necessary to make insurance valid for four occurrences always.

25.7 Accident or Injury to workman:

25.7.1 The SBIIMS Pvt. Ltd. shall not be liable for or in respect of any damages or compensation payable at law in respect or in consequence of any accident or injury to any workmen or other person in the employment of the contractor or any sub-contractor, save and except an accident or injury resulting from any act or default of the SBIIMS Pvt. Ltd. or their agents, or employees. The contractor shall indemnify and keep indemnified SBIIMS Pvt. Ltd. against all such damages and compensation, save and except as aforesaid, and against all claims, proceedings, costs, charges and expenses whatsoever in respect thereof or in relation thereto.

25.7.2 Insurance against accidents etc. to workmen

The contractor shall insure against such liability with an insurer approved by the SBIIMS Pvt. Ltd. during the whole of the time that any persons are employed by him on the works and shall, when required, produce to the architect / consultant such policy of insurance and receipt for payment of the current premium. Provided always that, in respect of any persons employed by any sub-contractor the contractor's obligation to insured as aforesaid under this sub-clause shall be satisfied if the sub-contractor shall have insured against the liability in respect of such persons in such manner that SBIIMS Pvt. Ltd. is indemnified under the policy but the contractor shall require such sub-contractor to produce to the Architect /consultant when such policy of insurance and the receipt for the payment of the current premium.

25.7.3 Remedy on contractor's failure to insure

If the contractor fails to effect and keep in force the insurance referred to above or any other insurance which he may be required to effect under the terms of contract, then

and in any such case the SBIIMS Pvt. Ltd. may effect and keep in force any such insurance and pay such premium or premiums as may be necessary for that purpose and from time to time deduct the amount so paid by the SBIIMS Pvt. Ltd. as aforesaid from any amount due or which may become due to the contractor, or recover the same as debt from the contractor.

- 25.7.4 Without prejudice to the others rights of the SBIIMS Pvt. Ltd. against contractors. In respect of such default, the employer shall be entitled to deduct from any sums payable to the contractor the amount of any damages costs, charges, and other expenses paid by the SBIIMS Pvt. Ltd. and which are payable by the contractors under this clause. The contractor shall upon settlement by the Insurer of any claim made against the insurer pursuant to a policy taken under this clause, proceed with due diligence to rebuild or repair the works destroyed or damaged. In this event all the monies received from the Insurer in respect of such damage shall be paid to the contractor and the Contractor shall not be entitled to any further payment in respect of the expenditure incurred for rebuilding or repairing of the materials or goods destroyed or damaged.

26.0 Commencement of Works:

The date of commencement of the work will be reckoned as the date, fifteen days from the date of award of letter by the SBIIMS Pvt. Ltd.

27.0 Time for completion

Time is essence of the contract and shall be strictly observed by the contractor. The entire work shall be completed within a period of 45 working Days from the date of commencement. If required in the contract or as directed by the Architect / consultant. The contractor shall complete certain portions of work before completion of the entire work. However, the completion date shall be reckoned as the date by which the whole work is completed as per the terms of the contract.

28.0 Extension of time

If, in the opinion of the Architect/consultant, the work be delayed for reasons beyond the control of the contractor, the Architect/consultant may submit a recommendation to the SBIIMS Pvt. Ltd. to grant a fair and reasonable extension of time for completion of work as per the terms of contract. If the contractor needs an extension of time for the completion of work or if the completion of work is likely to be delayed for any reasons beyond the due date of completion as stipulated in the contract, the contractor shall apply to the SBIIMS Pvt. Ltd. through the Architect' Consultant in writing at least 45 working Days before the expiry of the scheduled time and while applying for extension of time he shall furnish the reason in detail and his justification if any, for the delays. The architect/consultant shall submit their recommendations to the SBIIMS Pvt. Ltd. in the prescribed format for granting extension of time. While granting extension of time the contractor shall be informed the period extended time which will qualify for levy of liquidated damages. For the balance period in excess of original stipulated period and duly sanctioned extension of time by the provision of liquidated damages as stated under clause 10.0 shall become applicable. Further the contract shall remain in force even for the period beyond the due date of completion irrespective whether the extension is granted or not.

29.0 Rate of progress

Whole of the materials, plant and labour to be provided by the contractor and the mode, manner and speed of execution and maintenance of the works are to be of a kind and conducted in a manner to the satisfaction of the Architect / consultant should the rate of progress of the work or any part thereof be at any time be in the opinion the Architect / consultant too Slow to ensure the completion of the whole of the work the prescribed time or extended time for completion the Architect / consultant shall thereupon take such steps as considered necessary by the Architect / consultant to expedite progress so as to complete the works by the prescribed time or extended time. Such communications from the Architect / consultant neither shall relieve. The contractor from fulfilling obligations under the contract nor he will be entitled to raise any claims arising out of such directions.

30.0 **Work during nights and holidays**

Subject to any provision to the contrary contained in the contract no permanent work shall save as herein provided be carried on during the night or on holidays without the permission in writing of the Architect / consultant, save when the work is unavoidable or absolutely necessary for the saving of life or property or for the safety of the work in which case the contractor shall immediately advise the Architect / consultant. However the provisions of the clause shall not be applicable in the case of any work which becomes essential to carry by rotary or double shifts in order to achieve the progress and quality of the part of the works being technically required / continued with the prior approval of the Architect / consultant at no extra cost to the SBIIMS Pvt. Ltd..

All work at night after obtaining approval from competent authorities shall be carried out without unreasonable noise and disturbance.

31.0 **No compensation or restrictions of work**

If at any time after acceptance of the tender SBIIMS Pvt. Ltd. shall decide to abandon or reduce the scope of work for any reason whatsoever and hence not required the whole or any part of the work to be carried out. The Architect / consultant shall give notice in writing to that effect to the contractor and the contractor shall act accordingly in the matter. The contractor shall have no claim to any payment of compensation or otherwise what so ever on account of any profit or advantage which he might have derived from the execution of the Work fully but which he did not derive in consequence of the foreclosure of the whole or part of the work.

Provided that the contractor shall be paid the charges on the cartage only of materials actually and bonafide brought to the site of the work by the contractor and rendered surplus as a result of the abandonment, curtailment of the work or any portion thereof and then taken back by the contractor, provided however that the Architect / Consultant shall have in such cases the option of taking over all or any such materials at their purchase price or a local current rate whichever is less.

“In case of such stores having been issued from SBIIMS Pvt. Ltd. stores and returned by the contractor to stores, credit shall be given to him at the rates not exceeding those at which were originally issued to the contractor after taking into consideration and deduction for claims on account of any deterioration or damage while in the custody of the contractor and in this respect the decision of Architect / consultant shall be final.

32.0 **Suspension of work**

- i) The contractor shall, on receipt of the order in writing of the Architect / consultant (whose decision shall be final and binding on the contractor) suspend the progress

ofworks or any part thereof for such time and in such manner as Architect /consultant may consider necessary so as not to cause any damage or injury to the work already done or endanger the safety thereof for any of following reasons:

- a) On account any default on the part of the contractor, or
- b) For proper execution of the works or part thereof for reasons other than the default the contractor, or
- c) For safety of the works or part thereof.
The contractor shall, during such suspension, properly protect and secure the works the extent necessary and carry out the instructions given in that behalf by the Architect / consultant.
- i) If the suspension is ordered for reasons (b) and (c) in sub-para (i) above:
The contractor shall be entitled to an extension of time equal to the period of every such suspension. No compensation whatsoever shall be paid on this account.

33 Action when the whole security deposit is forfeited

In any case in which under any clause or clauses of this contract, the Contractor shall have rendered himself liable to pay compensation amounting to the whole of his security deposit the Architect / consultant shall have the power to adopt any of the following course as they may deem best suited to the interest of the SBIIMS Pvt. Ltd.:

- a) To rescind the contract (of which rescission notice in writing to the contractor by - Architect / consultant shall be conclusive evidence) and in which case the security, deposit of the contractor shall be forfeited and be absolutely at the disposal of SBIIMS Pvt. Ltd..
- b) To employ labour paid by the SBIIMS Pvt. Ltd. and to supply materials to carry out the work, or part of the work, debiting the contractor with the cost of the labour and materials cost of such labour and materials as worked out by the Architect/consultant shall final and conclusive against the contractor) and crediting him with the value of the work done, in all respects in the same manner and at the same manner and at the same rates as if it had been carried out by the contractor under the terms of this contract certificate of architect /consultant as to the value of work done shall be final conclusive against the contractor.
- c) To measure up the work of the contractor, and to take such part thereof as shall unexecuted, out of his hands, and to give it to another contractor to complete in which case any expenses which may be incurred in excess of the sum which would have been paid to the original contractor, if the whole work had been executed by him (The amount of which excess the certificates in writing of the Architects / consultant shall final and conclusive) shall be borne by original contractor and may be deducted f any money due to him by SBIIMS Pvt. Ltd. under the contract or otherwise, or from his security deposit or the proceeds of sale thereof, or sufficient part thereof.

In the event of any of above courses being adopted by the SBIIMS Pvt. Ltd. the contractor shall have no claim to compensation for any loss sustained by him by reasons of his having purchased or procured any material or entered into any engagements or make any advances on account of, or with a view to the execution of the work or the performance of the contract and in case the contract shall be rescind under the provision aforesaid, the contractor shall not be entitled to recover or to be paid any sum or any work thereto for actually performed under this contract, unless, and until the Architect / consultant will have certified in writing the performance of such work and the value payable in respect thereof, and he shall only be entitled to be paid the value so certified.

- c) The contractors for other trades directly appointed by the SBIIMS Pvt. Ltd. shall be entitled to take power and water connections from the temporary water and power supply obtained by the contractor. However, the concerned contractor shall make their own arrangements to draw the supply and pay directly the actual consumption charges at mutually agreed rates between them. All municipal charges for drainage and water connection for Construction purposes shall be borne by the contractor and charges payable for permanent connections, if any, shall be initially paid by the contractor and the SBIIMS Pvt. Ltd. will reimburse the amount on production of receipts.
- d) The SBIIMS Pvt. Ltd. as well as the Architect / consultant shall give all possible assistance to the Contractor's to obtain the requisite Permission from the various authorities, but the responsibility for obtaining the same in time shall be of the contractor.

9.0 Facilities for contractor's employees

The contractor shall make his own arrangement for the housing and welfare of his staff and workmen including adequate drinking water facilities. The contractor shall also make the arrangements at his own cost for transport where necessary for his staff and workmen to and from site of work at his own cost.

10.0 Lighting of works

The contractor shall at all times provide adequate and approved lighting as required for the proper execution and supervision and inspection of work.

11.0 Firefighting arrangements

- i) The contractor shall provide suitable arrangement for firefighting at his own cost. This purpose he shall provide requisite number of fire extinguishers and adequate number of buckets, some of which are to be always kept filled with sand and some with water. These equipments shall be provided at suitable prominent and easily accessible place and shall be properly maintained.
- ii) Any deficiency in the fire safety or unsafe conditions shall be corrected by the contractor at his own cost and, to the approval of the relevant authorities. The contractor make the following arrangements at his own cost but not limited the following:
 - a) Proper handling, storage and disposal of combustible materials and waste.
 - b) Work operations which can create fire hazards.
 - c) Access for fire-fighting equipments.
 - d) Type, number and location of containers for the removal of surplus materials and rubbish.

- e) Type, size, number and location of fire extinguishers or other fire fighting equipment.
- f) General house keeping

12.0 Site order book

A site order book shall be maintained at site for the purpose of quick communication between the Architect / Consultant. Any communication relating to the work may be conveyed through records in the site order book. Such a communication from one party to the other shall be deemed to have been adequately served in terms of contract. Each site order book shall have machine numbered pages in triplicate and shall be carefully maintained and preserved by the contractor and shall be made available to the architect / consultant as and when demanded. Any instruction which the architect / consultant may like to issue to the contractor or the contractor may like to bring to the architect / consultant two copies of such instructions shall be taken from the site order book and one copy will be handed over to the party against proper acknowledgment and the second copy will be retained for their record.

13.0 Temporary fencing/ barricading

The contractor shall provide and maintain a suitable temporary fencing / barricading and gates at his cost to adequately enclose all boundaries of the site for the protection of the public and for the proper execution and security of the work and in accordance with the requirement of the architect / consultant and regulations of local authorities. These shall be altered, relocated and adopted from time to time as necessary and removed on completion of the work.

14.0 Site meetings

Site meetings will be held to review the progress and quality evaluation. The contractor shall depute a senior representative along with the site representative and other staff of approved sub-contractors and suppliers as required to the site meetings and ensure all follow up actions. Any additional review meetings shall be held if required by the architect/ consultant. -

15.0 Disposal of refuse

The contractor shall cart away all debris, refuse etc. arising from the work from the site and deposit the same as directed by the architect / consultant at his own cost. It is the responsibility of the contractor to obtain from the local authorities concerned to the effect that all rubbish arising out of contractor's activities at the construction site or any other off-site activities borrow pits has been properly disposed off.

16.0 Contractor to verify site measurement

The contractor shall check and verify all site measurements whenever requested other specialists contractors or other sub-contractors to enable them to prepare the own shop drawing and pass on the information with sufficient promptness as will in any way delay the works.

17.0 Displaying the name of the work

The contractor shall put up a name board of suitable size as directed by the architect/ consultant indicating therein the name of the project and other details as given by the architect/consultant at his own cost and remove the same on completion of work.

18.0 As built drawings

- i) For the drawings issued to the contractor by the Architect / Consultant. The architect Consultant will issue two sets of drawings to the Contractor for the items for some changes have been made. From the approved drawings as instructed by the SBIIMS Pvt. Ltd. / Architect / Consultant. The contractor will make the changes made on these copies and return these copies to the architect / Consultant for their approval. In cases revision is required or the corrections are not properly marked the architect / Consultant will point out the discrepancies to the contractor. The contractor will have to incorporated these corrections and / or attend to discrepancies either on copies as directed by the architect / consultant and resubmit to him for approval. The architect / consultant will return one copy duly approved by him.

- ii) For the drawings prepared by the contractor

The contractor will modify the drawing prepared by him wherever the changes made by the SBIIMS Pvt. Ltd. / architect / consultant. And submit two copies of such modified drawings to the architect/ consultant for approval. The architect / consultant will return one copy of the approved drawing to the contractor.

19.0 Approved make

The contractor shall provide all materials from the list of approved makes at his own cost and also appoint the specialized agency for the waterproofing anti-termite, aluminum doors and windows and any other item as specified in the tender. The architect/consultant may approve any make / agency within the approved list as given in the tender after inspection of the sample/mock up.

20.0 Procurement of materials

The contractor shall make his own arrangements to procure all the required materials for the work .All wastages and losses in weight shall be to the contractors account

21.0 Excise duty, taxes, levies etc.;

The contractor shall pay and be responsible for payment of all taxes, duties, levies, royalties, fees, cess or charges in respect of the works including but not limited to sales tax, tax on works contract excise duty, and octroi, payable in respect of materials, equipment plant and other things required for the contract. All of the aforesaid taxes, duties, levies, fees and charges shall be to the contractor's account and the SBIIMS Pvt. Ltd. shall not be required to pay any additional or extra amount on this account. Variation of taxes, duties, fees, levies etc. if any, till completion of work shall be deemed to be included in the quoted rates and no extra amount on this account. Variation of taxes, duties, fees, levies etc. if any, till completion of work shall be deemed to be included in the quoted rates and no extra claim on this account will in any case be entertained. If a new tax or duty or levy or cess or royalty or octroi is imposed under as statutory law during the currency of contract the same shall be borne by the contractor.

22.0 Acceptance of tender

The SBIIMS Pvt. Ltd. shall have the right to reject any or all tenders without assigning any reason. They are not to bind to accept the lowest or any tender and the tenderer or tenderers shall have no right to question the acts of the SBIIMS Pvt. Ltd. However adequate transparency would be maintained by the SBIIMS Pvt. Ltd.

23.0 Photographs:

- The Contractor shall at his own expense supply to the Architects with duplicate hard copies of large photographs not less than 25 cm. x 20 cm. (10" x 8") of the works, taken from two approved portions of each building, at intervals of not more than one months during the progress of the work or at every important stage of construction.
- In addition to above, the contractor shall be bound to submit adequate no. of site photographs along with their each Running Bill for the project clearing showing major progress of work measured and claimed therein failing which the Architect/ SBIIMS Pvt. Ltd. may consider returning the Bill to the contractor and no claim for delay on this account will be entertained.

24.0 If the amount quoted by the bidder in the Price Bids is unreasonable/unrealistic or if items are quoted with " Zero & Negative value" , such tender/ tenders are not acceptable & liable to rejection. The contractor should quote in each & every tender items.

SAFETY CODE

1. First aid appliances including adequate supply of sterilized dressing and cotton wool shall be kept in a readily accessible place.
2. An injured person shall be taken to a public hospital without loss of time, in cases when the injury necessitates hospitalization.
3. Suitable and strong scaffolds should be provided for workmen for all works that cannot safely be done from the ground.
4. No portable single ladder shall be over 8 meters in length. The width between the side rails shall not be less than 30 cm. (clear) and the distance between two adjacent runnings shall not be more than 30 cm. When a ladder is used an extra mazdoor shall be engaged for holding ladder.
5. The excavated material shall not be placed within 1.5 meters of the edge of the trench half of the depth of trench whichever is more. All trenches and excavations shall be provided with necessary fencing and lighting.
6. Every opening in the floor of a building or in a working platform be provided with suitable means to prevent the fall of persons or materials by providing suitable fencing or railing whose minimum height shall be one meter.
7. No floor, roof or other part of the structure shall be so overloaded with debris or material as to render it unsafe.
8. Workers employed on mixing and handling material such as asphalt, cement, mortar, concrete and lime shall be provided with protective footwear and rubber hand gloves.
9. Those engaged in welding works shall be provided with welders' protective eye shield and gloves.
10. (i) No paint containing lead or lead products shall be used except in the form of paste readymade paint.
(ii) Suitable facemasks should be supplied for use by the workers when the paint applied in the form of spray or surface having lead paint dry rubbed and scrapped.
11. Overalls shall be supplied by the contractor to the painters and adequate facilities shall be provided to enable the working painters to wash during cessation of work.
12. Hoisting machines and tackle used in the works including their attachments anchor and supports shall be in perfect condition.
13. The ropes used in hoisting or lowering material or as a means of suspension shall be durable quality and adequate strength and free from defects.

APPENDIX HEREINBEFORE REFERRED TO

- 1) Name of the organization Offering Contract : The V.P. & Circle Head, State Bank of India Infra Management & Solutions Pvt. Ltd., Mezzanine Floor, State Bank of India, Local Head Local Head Office, Hoshangabad Road, Bhopal 462011
- 2) Consultants : ARCHITECT appointed by the SBIIMS for the particular Branch/ Project.
- 3) Site Address : AT VARIOUS BRANCHES, under AO, BHOPAL

LETTER OF DECLARATION

To,
 The V.P. & Circle Head,
 State Bank of India Infra Management & Solutions Pvt. Ltd.,
 Mezzanine Floor,
 State Bank of India,
 Local Head Office, Hoshangabad Road,
 Bhopal 462011

Dear Sir,

PROPOSED ELECTRICAL FOR AT VARIOUS BRANCHES, UNDER AO, BHOPAL

Having examined the terms & conditions, drawings, specifications, design relating to the works specified in the memorandum hereinafter set out and having visited and examined the site of the works specified in the said memorandum and having acquired the requisite information relating thereto and affecting the quotation, I/We hereby offer to execute the works specified in the said memorandum within the time specified in the said memorandum on the item rate basis mentioned in the attached schedule and in accordance in all respect with the specifications, design, drawings and instructions in writing referred to in conditions of Tender, the articles of agreement, conditions of contract and with such conditions so far as they may be applicable.

MEMORANDUM

(a)	Description of work	Proposed Electrical & AC works of AT VARIOUS BRANCHES, under AO, BHOPAL
(b)	Earnest Money	Rs. 50000/- (fifty thousand only) by means of Demand Draft / Pay Order from any scheduled Nationalized Bank drawn in favour of SBI Infra Management Solutions Pvt. Ltd. and payable in Bhopal.
(c)	Time allowed for completion of work from the date of issue of work order.	45 working Days from the date of commencement as per tender.

Should this tender be accepted, I/we hereby agree to abide by and fulfill the terms and provisions of the said conditions of Contract annexed hereto so far as they may be applicable or in default thereof to forfeit and pay to SBIIMS PVT.LTD., the amount mentioned in the said conditions.

I/we have deposited Demand Draft / Banker's Cheque / FDR for a sum of **Rs. 50000/- (rupees fifty thousand)** as Earnest money deposit with the SBI Infra Management Solutions Pvt. Ltd. Should I/we do fail to execute the contract when called upon to do so, I/we hereby agree that this sum shall be forfeited by me/us to SBI Infra Management Solutions Pvt. Ltd.

We understand that as per terms of this tender, the SBIIMS Pvt. Ltd. may consider accepting our tender in part or whole or in phases. We, therefore, undertake that we shall not raise any claim / compensation in the eventuality of Bank deciding to drop any of the building / buildings from the scope of work of this tender at any stage during the contract period. Further, we also undertake to execute the work entrusted to us in phases on our approved rates and within the stipulated time limit without any extra claim for price escalation as provided for in Clause 11.1.7 and 11.1.8 “Instructions to Tenderers” of this tender.

We, hereby, also undertake that, we will not raise any claim for any escalation in the prices of any of the material during the currency of contract/execution/completion period.

Yours faithfully,

Signature of contractor

TECHNICAL SPECIFICATIONS

CHAPTER : I GENERAL

1. All works shall be carried out as per accepted standard and as per IS: Specifications.
2. All materials, fittings, accessories etc. for use in electric installation shall be as per approved list of material attached, unless otherwise specified. In the case of materials for which no specific make is approved or specified the same shall confirm to relevant Indian Standard Specification and/or shall be approved by the SBIIMS Engineer in Charge.
3. In general, circuit wiring is to be done in separate conduits and not in point wiring conduits.
4. Wiring shall be done only in steel conduit system.
5. 2x1.5 Sqmm (22/0.3mm) multi stranded denotes 2 wires of 1.5 Sqmm. (22/0.3mm) multi stranded and so on for other sizes.
6. In case where metric size/rating materials is/are not available, equivalent British size/rating shall be permitted to be used with the written approval of the Consultant.
7. In point wiring for light points where bulkhead is provided in place of ceiling rose/batten holder, Rs.16.00 per point to be deducted (-).
8. Blanking plates shall be provided in the MCB distribution board in the blank unused ways, where MCBs are not provided, no extra payment to be allowed for the same, and if blanking plate not provided Rs.3/- per plate (per way) to be deducted from the rates of MCB enclosures (-).
9. The rates given in this schedule, are for the finished work covering cost of all materials, labour, royalties, lease rent, wastage temporary work, hire charges of tools and plant, equipment and machinery required to complete the work, over head charges and profit etc. unless specified other wise.
10. In case of any contradiction in the provision of the specifications and Schedule of rate, the provision of the latter would take precedence.
11. In booking dimensions, the order shall be consistent and generally in the sequence of length, width and height or depth or thickness.
13. The following tolerance shall be permitted in measurement unless stated otherwise. Any work done extra over the specified dimensions shall be ignored. Tolerances for areas and cubic contents are applicable only for Civil Works associated with the electrical work:
 - (a) Dimension shall be measured to the nearest 0.05 M.
 - (b) Areas shall be worked out in the nearest 0.01 Sqm.
 - (c) Cubic contents shall be worked out to the 0.01 Cum.
14. The agency carrying out the work shall certify that the work has been carried out as per statutory or other regulations in force and prescribed specifications.
15. The materials and labour involved shall be described and it shall be stated that the materials used are of approved make of the Board and as per list attached to the agreement/NIT etc.

16. The provision of scaffolding or ladder or any tools and plants required shall be deemed to be included in the item, unless otherwise stated.
17. Cutting through walls and floors lifting up floor boards and refixing cutting out plaster and making good all the work disturbed, notching or drilling holes through joists etc. shall be deemed to be included with the item of work.
18. The work shall be strictly carried out in accordance with the detailed layout plan of Electrical installation unless otherwise necessary to be altered due to site conditions during the course of execution.
19. Completion plans for the installation carried out shall be furnished.
20. Method and type of wiring shall be fully described and measured separately, it shall be classified according to the size and types of cables used.
21. Concealed conduit work and surface conduit work shall also be classified and described separately the former shall include embedding the conduit and allied fitting in walls, floors etc. during constructions or cutting chases, or both and making good as necessary.
22. Point wiring shall include all work necessary in complete wiring of any length via a switch :
 - (a) Ceiling rose or connector (in case of ceiling and exhaust fan points or stiff pendent).
 - (b) Ceiling rose (in case of pendent points except stiff pendent points).
 - (c) Lamp holder (in case of wall brackets, batten points bulk head fittings and similar other fittings).
 - (d) Call bell or Buzzer (in this case the words "Via the switch" shall be read as "Via the bell push or ceiling rose" as the case may be.
 - (e) Upto Electric Clock outlet.
 - (f) Upto socket outlet.
- 22.1 When there is only one point on the distribution circuit (one way), the same shall be measured in two parts as circuit wiring according to the definition of the circuit wiring and the other as "Points" according to the above definition for "Points".
- 22.2 The following shall be deemed to be included in the Point Wiring.
 - (a) Rigid steel conduit/rigid PVC non-metallic conduit/ casing and capping/batten as the case may be, accessories for the same and wiring cables from controlling switch or any other type of switch to the point with ferrule numbering.
 - (b) Switch and ceiling rose or connector or batten holder with special and suitable round block for neatly housing the connector as required.
 - (c) In case of wall brackets, bulk head fitting and similar fittings, cable as required upto the Lamp Holder.
 - (d) Bushed conduit or porcelain tubing when cables pass through wall etc.
 - (e) Earth wire from 3 pin socket point to the common earth including connection to the pin of 3/5 pin socket outlet except earth wire from the first tapping of live wire to the sub distribution board.
 - (f) All PVC/Wooden/Metal blocks switch boards and boxes sunk or surface type, with suitable covering, (Phenolic laminated sheet) including those required for mounting fan regulator but excluding those under the distribution board and main control switch.

- (g) All fixing accessories such as clips, nails, screws, phil plug, rawl plug, wooden plug etc. as required.
- (h) Joint for junction boxes and connecting the same as required.
- (i) Connections to ceiling rose or connector, socket outlet, lamp holder, fan regulator etc.
- (j) Socket outlets as specified.
- (k) Inter connection wiring between points on the same circuits in same switch box or from another.
- (l) Connector as required for looping of wiring for two or more wires wherever required.
- (m) Pendants, if provided shall be paid extra.
- (n) All the switches, socket, plate, boxes, blank plate and regulator to be modular plate type.

22.3 The mechanical protection provided to the wiring coming within 1.5 Mtr. from floor level upto switch board shall be deemed to have been included in the item of work. Method of installation and making good the damages shall be described in the specification.

22.4 The common earth continuity conductor shall be described stating material size and method of installation.

23.3 Any junction box provided for extending the wiring beyond the point referred to shall not be treated as the nearest tapping point.

CHAPTER: II

METALLIC CONDUIT WIRING SYSTEM

2.0 SCOPE

This chapter covers the detailed requirements for wiring work in metallic conduits. This chapter covers both surface and recessed types of works.

2.1 APPLICATION

- (i) Recessed conduit is suitable generally for all applications. Surface conduit work may be adopted in places like workshops, plant rooms, pump rooms, wiring above false ceiling/below false flooring and at locations where recessed work may not be possible to be done. The type of work viz. surface or recessed shall be as specified in the respective works.
- (ii) Flexible conduits may only be permitted for inter connections between switch gear, DB's and conduit terminations in wall.

2.2 MATERIALS

2.2.1 Conduits

- (i) All rigid conduit pipes shall be of steel and be ISI marked. The wall thickness shall be not less than 1.6mm (16 SWG) for conduits upto 32mm dia and not less than 2mm (14 SWG) for conduits above 32mm dia. These shall be solid drawn or reamed by welding and finished with galvanized or stove enamelled surface.

- (ii) The maximum number of PVC insulated cables conforming to IS:694-1990 that can be drawn in one conduit is given sizewise in Table-1 and the number of cables per conduit shall not be exceeded. Conduit sizes shall be selected accordingly in each run.
- (iii) No steel conduit less than 20mm in diameter shall be used.

2.2.2 Conduit accessories

- (i) The conduit wiring system shall be complete in all respects including their accessories.
- (ii) All conduit accessories shall be of threaded type and under no circumstances pin grip type or clamp grip type accessories shall be used.
- (iii) Bends couplers etc. shall be solid type in recessed type of works and may be solid or inspection type as required, in surface type of works.
- (iv) (a) Saddles for surface conduit work on wall shall not be less than 0.55mm (24 gauge) for conduits upto 25mm dia and not less than 0.9mm (20 gauge) for largest diameter. The corresponding widths shall be 19mm and 25mm.
(b) The minimum width and the thickness of girder clips used for fixing conduits to steel joists, and clamps shall be as per Table-II.

2.2.3 Outlets

- (i) The switch box or regulator box shall be made of metal on all sides, except on the front. In case of welded mild steel sheet boxes, the wall thickness shall not be less than 1.2mm (18 gauge) for boxes upto a size of 20cm X 30cm and above this size 1.6mm (16 gauge) thick MS boxes shall be used. The metallic boxes shall be duly painted with anticorrosive paint before erection as per Specifications.
- (ii) GI earth terminal with stud and 2 G.I. washers shall be provided in each MS box for termination of protective conductors and for connection to socket outlet/metallic body of fan regulator etc.
- (iii) A metal strip shall be welded/screwed, to the metal box as support if tumbler type of control switches, sockets and/or fan regulators are to be fixed therein.
- (iv) Clear depth of the box shall not be less than 50/60 mm and this shall be increased suitably to accommodate mounting of fan regulators in flush pattern.
- (v) The fan regulators can also be mounted on the switch box covers, if so stipulated in the tender specifications, or if so directed by the Engineer- in-Charge.
- (vi) Except where otherwise stated, 3mm thick phenolic terminated sheets shall be fixed on the front with brass screws, or aluminum alloy/cadmium plated iron screws as approved by the Consultant.

2.3 INSTALLATION

2.3.1 Common aspects for recessed and surface conduit works

- (i) Conduit Joints

- (a) The conduit work of each circuit or section shall be completed before the cables are drawn in.
- (b) Conduit pipes shall be jointed by means of screwed couplers and screwed accessories only. Threads on conduit pipes in all cases shall be between 13mm to 19mm long sufficient to accommodate pipes to full threaded portion of couplers or accessories.
- (c) Cut ends of conduit pipes shall have no sharp edges, nor any burrs left to avoid damage to the insulation of the conductors while pulling them through such pipes.
- (d) The Consultant, with a view to ensuring that the above provision has been carried out, may require that the separate lengths of conduit etc. after they have been prepared, shall be submitted for inspection before being fixed.
- (e) No bare threads portion of conduit pipe shall be allowed unless such bare threaded portion is treated with anticorrosive pipe servative or covered with approved plastic compound.
- (ii) Bends in conduit
 - (a) All necessary bends in the system, including diversion, shall be done either by neatly bending the pipes without cracking with a bending radius of not less than 7.5cm or alternatively, by inserting suitable solid or inspection type normal bends, elbows or similar fittings, or by fixing cast iron inspection boxes, whichever is most suitable.
 - (b) No length of conduit shall have more than the equivalent of four quarter bends from outlet to outlet.
 - (c) Conduit fittings shall be avoided as far as possible on conduit system exposed to weather. Where necessary, solid type fittings shall be used.
- (iii) Outlets
 - (a) All outlets such as switches, wall sockets etc. may be either flush mounting type, or of surface mounting type, as specified in the Additional Specifications.
- (iv) Painting after erection

After installation, all accessories of conduit pipes, fittings, switch and regulator boxes etc. shall be painted.

2.3.2 Additional requirements for surface conduit work

- (i) Painting before erection

The outer surface of conduit including all bends, unions, tees, junction boxes, etc. forming part of the conduit system, shall be adequately protected against rust when such system is exposed to weather, by being painted with 2 coats of red oxide paint applied before they are fixed.
- (ii) Fixing conduit on surface
 - (a) Conduit pipes shall be fixed by saddles, secured to suitable approved plugs with screws in an approved manner at an interval of not more than one metre, but on either side of the couplers or bends of similar fittings, saddles shall be fixed at a distance of 45 cm from the centre of such fittings.
 - (b) Where conduit pipes are to be laid along the trusses steel joists etc. the same shall be secured by means of saddles or girder clips or clamps as required by the Consultant.
 - (c) In long distance straight run of conduit, inspection type couplers at reasonable intervals shall be provided, or running threads with couplers and jamnuts shall be provided.

(iii) Fixing outlet boxes

Only a portion of the switch box shall be sunk in the wall, the other portion being projected out for suitable entry of conduit pipes into the box.

2.3.3 Additional requirements for recessed conduit work

(i) Making chase

- (a) The chase in the wall shall be neatly made, and of ample dimensions to permit the conduit to be fixed in the manner desired.
- (b) In the case of buildings under construction, the conduits shall be buried in the wall before plastering, and shall be finished neatly after erection of conduit.
- (c) In case of exposed brick/rubble masonry work, special care shall be taken to fix the conduit and accessories in position along with the building work.

(ii) Fixing conduits in chase

- (a) The conduit pipe shall be fixed by means of staples, J-hooks or by means of saddles, not more than 60cm apart, or by any other approved means of fixing.
- (b) All threaded joints of conduit pipes shall be treated with some approved preservative compound to secure protection against rust.

(iii) Fixing conduits in 'RCC work'

- (a) The conduit pipes shall be laid in position and fixed to the steel reinforcement bars by steel binding wires before the concreting is done. The conduit pipes shall be fixed firmly to the steel reinforcement bars to avoid their dislocation during pouring of cement concrete and subsequent tamping of the same.
- (b) Fixing of standard bends or elbows shall be avoided as far as practicable, and all curves shall be maintained by bending the conduit pipe itself with a long radius which will permit easy drawing in of conductors.
- (c) Location of inspection/junction boxes in RCC work should be identified by suitable means to avoid unnecessary chipping of the RCC slab subsequently to locate these boxes.

(iv) Fixing inspection boxes

- (a) Suitable inspection boxes to the minimum requirement shall be provided to permit inspection and to facilitate replacement of wires, if necessary.
- (b) These shall be mounted flush with the wall or ceiling concrete. Minimum 65mm depth junction boxes shall be used in roof slabs and the depth of the boxes in other places shall be as per IS:2667-1977.
- (c) Suitable ventilating holes shall be provided in the inspection box covers.

(v) Fixing switch boxes and accessories

Switch boxes shall be mounted flush with the wall. All outlets such as switches, socket outlets etc. shall be flush mounting type, unless otherwise specified in the Additional Specifications.

(vi) Fish wire

To facilitate subsequent drawing of wires in the conduit. GI fish wire of 1.6mm/1.2mm (16/18 SWG) shall be provided along with the laying of the recessed conduits.

(vii) Bunching of cables

- (a) Cables carrying direct current may, if desired, be bunched whatever their polarity, but cables carrying alternating current, if installed in metal conduit shall always be bunched so that the outgoing and return cables are drawn into the same conduit.
- (b) Where the distribution is for single phase loads only, conductors for these phases shall be drawn in one conduit.
- (c) In case of three phase loads, separate conduits shall be run from the distribution boards to the load points, or outlets as the case may be.

2.3.4 Earthing requirements

- (i) The entire system of metallic conduit work, including the outlet boxes and other metallic accessories, shall be mechanically and electrically continuous by proper screwed joints, or by double checknuts at terminations. The conduit shall be continuous when passing through walls or floors.
- (ii) Protective (loop earthing) conductor(s) shall be laid along the runs of the conduit between the metallic switch boxes and the distribution boards/switch boards, terminated thereto.

These conductors shall be of such size and material as specified. Depending upon their size and material, the protective earth conductors shall be either drawn inside the conduits along with the cables, or shall be laid drawn inside the conduits along with the cables, or shall be laid external to

the conduits. When laid external to the conduits, this shall be properly clamped with the conduit at regular intervals.

- (iii) The protective conductors shall be terminated properly using earth studs, earth terminal block etc. as the case may be.
- (iv) Gas or water pipe shall not be used as protective conductor (earth medium).

TABLE - I

Maximum number of PVC insulated 650/1100 V grade aluminium/copper conductor cable conforming to IS:694-1990

Nominal cross sectional area of conductor in Sqmm.	20mm		25mm		32mm		38mm		51mm		64mm	
	S	B	S	B	S	B	S	B	S	B	S	B
1	2	3	4	5	6	7	8	9	10	11	12	13
1.50	5	4	10	8	18	12	--	--	--	--	--	--
2.50	5	3	8	8	12	10	--	--	--	--	--	--
4	3	2	6	5	10	8	--	--	--	--	--	--
6	2	--	5	4	8	7	--	--	--	--	--	--
10	2	--	4	3	5	5	8	6	--	--	--	--
16	--	--	2	2	3	3	6	5	10	7	12	8

25	--	--	--	--	3	2	5	3	8	6	9	7
35	--	--	--	--	--	--	3	2	6	5	8	6
50	--	--	--	--	--	--	--	--	5	3	6	5
70	--	--	--	--	--	--	--	--	4	3	5	4

Note:

1. The above table shows the maximum capacity of conduits for a simultaneous drawing in of cables.
2. The columns headed 'S' apply to runs of conduit which have distance not exceeding 4.25 m between draw in boxes and which do not deflect from the straight by an angle of more than 15 degrees columns headed 'B' apply to runs of conduit which deflect from the straight by an angle of more than 15 degrees.
3. Conduit sizes are the nominal external diameter.

TABLE - II

Girder Clips or clamps

(Clause 2.2.2(iv))

Size of conduit	Width	Thickness
(i) 20mm	19mm	0.9mm (20 SWG)
(ii) 25mm	19mm	0.9mm (20 SWG)
(iii) 32mm and above	25mm	1.2mm (18 SWG)

CHAPTER: III**TESTING OF INSTALLATION**
-----**3.0 SCOPE**

This chapter describes the details of tests to be conducted in the completed internal electrical installations, before commission.

3.1 GENERAL**3.1.1 Tests**

On completion of installation, the following tests shall be carried out:

1. Insulation resistance test.
2. Polarity test of switch.
3. Earth continuity test.
4. Earth electrode resistance test.

3.1.2 Witnessing of tests

Testing shall be carried out for the completed installations, in the presence of and to the satisfaction of the Consultant by the contractor. All test results shall be recorded and submitted to the Department.

3.1.3 Test instruments

All necessary test instruments for the tests shall be arranged by the contractor if so required by the Consultant.

3.2 INSULATION RESISTANCE

3.2.1 The insulation resistance shall be measured by applying between earth and the whole system of conductors, or any section thereof with all fuses in place, and all switches closed, and except in earthed concentric wiring, all lamps in position, or both poles of the installation otherwise electrically connected together, a direct current pressure of not less than twice the working pressure, provided it need not exceed 500 volts for medium voltage, circuits, where the supply is derived from a three wire D.C. or a polyphase A.C.system the neutral pole of which is connected to earth either directly or through added resistance, the working pressure shall be deemed to that which is maintained between the phase conductor and the neutral.

3.2.2 The insulation resistance shall also be measured between all the conductors connected to one pole, or phase conductor of the supply, and all the conductors conned to the neutral, or to the other pole or phase conductors of the supply with all the lamps in position, and switches in off position, and its value shall be not less than that specified in sub clause 3.1.3.

3.2.3 The insulation resistance in mega ohms measured as above shall not less than 12.5 mega ohms for the wiring with PVC insulated cable subject to a minimum of 1 megaohm.

- 3.2.4 Where a whole installation is being tested, a lower value than that given by the formula, subject to a minimum of 1 megaohm, is acceptable.
- 3.2.5 A preliminary and similar test may be made before the lamps etc. are installed, and in this event the insulation resistance to earth should not be less than 25 megaohms for the wiring with PVC insulated cables, subject to a minimum of 2 megaohms.
- 3.2.6 The term outlet includes every point along with every switch except that a switch combined with a socket outlet, appliance or lighting fitting is regarded as one outlet.
- 3.2.7 Control rheostats, heating and power appliances and electric signs may, if required, be disconnected from the circuit during the test, but in that event the insulation resistance between the case or frame work, and all live parts of each rheostat, appliance and sign shall be not less than that specified in the relevant Indian Standard Specifications, or where there is no such Specification, shall be not less than one megaohm.

3.3 POLARITY TEST OF SWITCH

- 3.3.1 In a two wire installation a test shall be made to verify that all the switches in every circuit have been fitted in the same conduits throughout, and such conductor shall be labeled or marked for connection to the phase conductor or to the non-earthed conductors of the supply.
- 3.3.2 In a three wire or a four wire installation, a test shall be made to verify that every non linked single pole switch is fitted in a conductor which is labeled, or marked for connection to one of the phase conductors of the supply.
- 3.3.3 The installation shall be connected to the supply for testing the terminals of all switches shall be tested by a test lamp, one lead of which is connected to the earth. Glowing of test lamp to its full brilliance, when the switch is in 'ON' position irrespective of appliance in position or not, shall indicate that the switch is connected to the right polarity.

3.4 TESTING OF EARTH CONTINUITY PATH

The earth continuity conductor, including metal conduits and metallic envelopes of cables in all cases, shall be tested for electric continuity. The electrical resistance of the same along with the earthing lead, but excluding any added resistance, or earth leakage circuit breaker, measured from the connection with the earth electrode to any point in the earth continuity conductor in the completed installation shall not exceed one ohm.

3.5 MEASUREMENT OF EARTH ELECTRODE RESISTANCE

- 3.5.1 Two auxilliary earth electrode, besides the test electrode, are placed at suitable distance from the test electrode (see figure). A measured current is passed between the electrode 'A' to be tested and an auxilliary current electrode 'C' and the potential difference between the electrode 'A' and auxilliary potential B' is measured. The resistance of the test electrode 'A' is then given by;

$$V$$

$$R = \frac{V}{I}$$

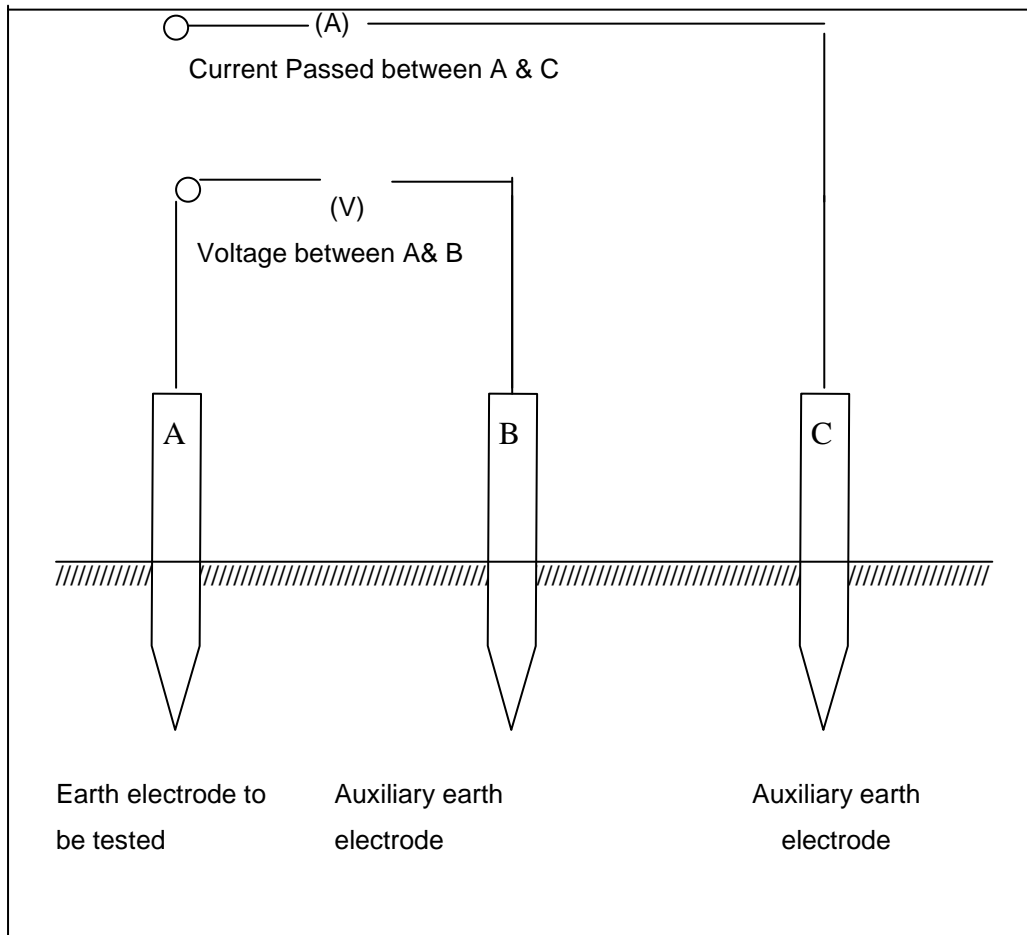

I

Where,

R = Resistance of the test electrode in ohms.

V = Reading of the voltmeter in volts.

I = Reading of the ammeter in amps

3.5.2

(i) Stray currents flowing in the soil may produce serious errors in the measurement of earth resistance. To eliminate this, hand driven generator is used.

(ii) If the frequency of the supply of hand driven generator coincides with the frequency of stray current, there will be wandering of instrument pointer. An increase or decrease of generator speed will cause this to disappear.

3.5.3 At the time of test, the test electrode shall be separated from the earthing system.

3.5.4 The auxiliary electrodes shall be of 13mm diameter mild steel rod driven upto 1m into the ground.

3.5.5 All the three electrodes shall be so placed that they are independent of the resistance area of each other. If the test electrode is in the form of a rod, pipe or plate, the auxiliary current electrode 'C' shall be placed at least 30m away from it, and the auxiliary potential electrode 'B' shall be placed mid way between them.

- 3.5.6 Unless three consecutive readings of test electrode resistance agree, the test shall be repeated by increasing the distance between electrodes A and C upto 50m and each time placing the electrode B midway between them.
- 3.5.7 On these principles, 'Megger Earth Tester' containing a direct reading ohm-meter, a hand driven generator and auxillary electrodes are manufactured for direct reading of earth resistance of electrodes.

3.6 TEST CERTIFICATE

On completion of an electrical installation (or an extension to an installation) a certificate shall be furnished by the contractor, countersigned by the certified supervisor under whose direct supervision the installation was carried out. This certificate shall be in the prescribed form as given in Appendix 'A' in addition to the test certificate required by the Local Electric Supply Authorities.

CHAPTER-IV

MCB TYPE DISTRIBUTION BOARDS

- 4.1 (i) MCBDB's may be of single phase, 3 phase (horizontal type) suitable for feeding single phase loads, or 3 phase (vertical type) suitable for feeding single phase as well as 3 phase loads as specified. These shall be complete with accessories, but without MCBs which shall be specified as a separate item in the tender documents.
- (ii) The current ratings and the number of ways shall be as specified. Blanking plates shall be provided to close unused ways.
- (iii) DB with integral incomer

Where it is proposed to install the controlling MCCB/ELCB/MCB, the total number of outgoing MCBs will be reduced by one or two numbers corresponding to SP or SP&N at the incoming, since the total number of ways are fixed in MCBDBs. Bus bars in such units shall also be correspondingly shorter. The inter connections shall be done between the incomer and outgoings as part of the DB in the works.

- (iv) MCBDBs shall be of surface/flush mounting pattern according to the requirement of their location and shall be suitable to accommodate MCB's and ELCB at incoming as well as outgoing in single pole or multipole configuration as required.
- (v) MCBDB's shall be dust and vermin proof conforming to IP 42 and shall be fabricated out of CRCA sheet steel. 1.2 mm thick with stove enamelled paint finish.
- (vi) MCBDB's shall have removable type end plates with knock outs at the bottom and top.
- (vii) Only the knobs of the MCBs shall protrude out of the front covers through openings neatly machine made for the purpose.
- (viii) The bus bars used shall be solid electrolytic copper of appropriate sections.
- (ix) DIN bar(s) shall be provided for mounting the MCBs.

4.2 PRE-WIRED MCB DISTRIBUTION BOARDS

- (i) Prewired MCBDBs shall be provided only where specified.
- (ii) The complete board shall be factory fabricated and shall be duly prewired in the works, ready for installation at site.
- (iii) The board shall be of wall mounted cubical type construction, fabricated out of 1.2 mm thick sheet steel with stove enamelled paint finish.
- (iv) The board shall also be provided with a loose wire box (if mentioned in the scope of work) as a compartment for the complete width and, depth of the board and of minimum height of 125 mm in case of TPN DB's and 100 mm in case of SPN BD's.
- (v) The board shall be provided with a hinged cover of 1.6mm thick sheet steel in the front. Only the knobs of the MCBs shall protrude out of the front covers through openings neatly machine made for the purpose.
- (vi) Knock out holes at the bottom and detachable plate with knock out holes at the top of the board shall be provided.
- (vii) The board shall be complete with the following accessories.
 - (a) 200A copper bus bar(s)
 - (b) Neutral link
 - (c) Common earth bar
 - (d) Din bar for mounting MCBs
 - (e) Elemex type terminal connectors suitable for incoming and outgoing cables.
 - (f) A set of indication lamps with HRC cartridge fuses for each phase of the incoming supply.
 - (g) Earthing stud(s).

(viii) The board shall be fully prewired with single core PVC insulated copper conductors/insulated solid copper links and terminated on to extended type terminal connectors, suitable for connections to the sizes of the respective conductors.

(ix) All incoming and outgoing wiring to the prewired MCBDB's shall be terminated only in the Elemex type extended terminal connectors to be provided within the DB. The terminal connectors shall therefore be so provided as to facilitate easy cable connections and subsequent maintenance.

(x) A common copper earth bar shall be provided within the loose wire box. The common neutral bar as well as the terminal connectors shall however be provided within the main compartment just below the loose wire box.

4.3 MINIATURE CIRCUIT BREAKERS (MCB's)

- (i) 'Light' series 10 KA Breaking Capacity shall be used only for normal 'lighting' circuits.
- (ii) 'Power' series 10 KA Breaking Capacity MCB's shall be invariably used for motor loads helogen lamp fittings, sodium/mercury discharge lamps and all 'power' circuits.
- (iii) Ratings (Amps as well as KA), number of poles, type as MCB or isolator, etc. shall be as specified in the tender documents.

CHAPTER : V**MEDIUM VOLTAGE CABLING****5.0 Scope**

5.1 The scope of work shall cover supply, laying, connecting, testing and commissioning of low and medium voltage power and control cabling.

5.2 Standards

5.2.1 The following standards and rules shall be applicable:

- 1) IS:1554 PVC insulated electric cables (heavy duty)
- 2) IS:1753 Alluminium conductors for insulated cables
- 3) IS:961 Recommended current ratings for cables.
- 4) Indian electricity act and rules. All codes and standards mean the latest. Where not specified otherwise the installation shall generally follow the Indian Standard Codes of Practice or the British Standard Codes of Practice where Indian Standards are not available.

5.3 Cables

5.3.1 All cables shall be 1100 volt grade PVC insulated, sheathed with or without steel armouring as specified and with an outer PVC protective sheath. Cables shall have high conductivity stranded aluminium or copper conductors and cores colour coded to the Indian Standards.

5.3.2 All cables shall be new without any kinds or visible damage. The manufacturers name, insulating material, conductor size and voltage class shall be marked on the surface of the cable at every 600mm centres.

5.4 Installation

5.4.1 Cables shall be laid in the routes marked in the drawings. Where the route is not marked, the contractor shall mark it out on the drawings and also on the site and obtain the approval of the Architect/Consultant before laying the cable. Procurement of cables shall be on the basis of actual site measurements and the quantities shown in the schedule of work shall be regards as a guide only.

5.4.2 Cables, running indoors shall be laid on walls, ceiling, inside shafts or trenches. Single cables laid shall be fixed directly to walls or ceiling and supported at not more than 500mm. Where number of cables are run, necessary perforated cable trays shall be provided wherever shown. Perforated trays shall be mild steel or aluminium as specified in the schedule of work and supported on mild steel frame work as shown on drawings or as approved. Cables laid in built up trenches shall be on steel supports. Plastic identification tags shall be provided at every 30m.

5.4.3 Cables shall be bent to a radius not less than 12 (twelve) times the overall diameter of the cable or in accordance with the manufacturer's recommendations whichever is higher.

5.4.4 In the case of cables buried directly in ground, the cable route shall be parallel or perpendicular to roadways, walls etc. cables shall be laid on an excavated, graded trench, over a sand or soft earth cushion to provide protection against abrasion. Cables shall be protected with brick or cement tiles as shown on drawings. Width of excavated trenches shall be as per drawings. Backfill over buried cables shall be with a minimum earth cover of 600mm. The cables shall be provided with cables markers at every 35 meters and at all loop points.

5.4.5 The general arrangement of cable laying is shown on drawings. All cables shall be full runs from panel to panel without any joints or splices. Cables shall be identified at end terminations indicating the feeder number and the Panel/Distribution board from where it is being laid. All cable terminations for conductors upto 4 sqmm may be insertion type and all higher sizes shall have tinned copper compression lugs. Cable terminations shall have necessary brass glands. The end terminations shall be insulated with a minimum of six half lapped layers of P.V.C. tapes. Cable armouring shall be earthed at both ends.

5.5 Testing

5.5.1 MV cables shall be tested upon installation with a 500V Meggar and the following readings established

1) Continuity on all phases

2) Insulation Resistance

(a) between conductors

(b) all conductors and ground All test readings shall be recorded and shall form part of the completion documentation.

SECTION : VI

EARTHING

6.0 Scope

6.1 The scope of work shall cover earthing stations, laying aluminium/copper earth strips and connecting the power panels, DBs and switch boards.

6.2 Standards

6.2.1 The following standards and rules shall be applicable:

1) IS:3043-1966 Code of Practice for earthing.

2) Indian Electricity Act and Rules.

6.2.2 All codes and standards mean the latest. Where not specified otherwise the installation shall generally follow the Indian Standard Code of Practice or the British Standard Codes of Practice in the absence of Indian Standards.

6.3 Plate Earthing Station

6.3.1 The substation earthing shall be with copper plate earthing station unless otherwise specified.

6.3.2 The earthing station shall be as shown on the drawing. The earth resistance shall be maintained with a suitable soil treatment.

6.3.3 The resistance of each earth station should not exceed 2 ohms.

6.3.4 The earth lead shall be connected to the earth plate through copper/brass bolts.

6.4 Pipe Earthing Station

6.4.1 The earth station shall be as shown on the drawing and shall be used for equipment earth grid. The earth electrode shall be 2.5 meter long 40mm dia galvanized steel pipe. The earth resistance shall be maintained with a suitable soil treatment.

6.4.2 The resistance of each earth station should not exceed 5 ohms.

6.4.3 The earth lead shall be fixed to the pipe with a clamp and safety set screws. The clamps shall be permanently accessible.

6.5 Earth leads and connections

6.5.1 Earth lead shall be bare copper or aluminium or galvanised steel as specified with sizes shown on drawings. Copper leads shall have a phosphor content of not over 0.15 percent. Aluminium and galvanised steel buried in ground shall be protected with bitumen and hessian wrap or polythene faced hessian and bitumen coating. At road crossings necessary hume pipes shall be laid. Earth lead run on surface of wall or ceiling shall be fixed on saddles or wall so that the strip is atleast 8mm away from the wall surface.

6.5.2 All earth strip shall be jointed as follows:

Copper Copper rivetting with 80mm fish plate and brazing

Aluminium Riveting with 2 Nos. 100mm long bimetal fish plates using copper rivets

Galvanised Steel Lap welding with 50mm minimum lap

6.5.3 All strips shall be run on walls/beams with 6mm thick galvanised steel earth saddles at 500mm centre to centre.

6.6 Equipment Earthing

6.6.1 All apparatus and equipment transmitting or utilising power shall be earthed in the following manner. Copper earth wires shall be used where copper wires are specified. Aluminium wires may be used where aluminium phase wires are specified unless otherwise indicated in the schedule of work.

6.6.2 Power transmission apparatus

Metallic conduit shall not be accepted as an earth continuity conductor. A separate insulated/bare earth continuity conductor of size 50% of the phase conductor subject to the minimum and maximum shall be provided.

	Copper	Aluminium	Galvanised Steel
Minimum (sqmm)	2.5	4.0	6
Maximum (sqmm)	65	100	200

The earth continuity conductor may be drawn inside the conduit in which case, it should be insulated.

6.6.3 Non-metallic conduit shall have an insulated earth continuity conductor of the same size as for metallic conduit. All metal junction and switch boxes shall have an inside earth stud to which the earth conductor shall be connected. The earth conductor shall be distinctly colored (green) for easy identification.

6.6.4 Armoured cables shall be earthed by 2 distinct earth connections to the armouring at both the ends and the size of connection being as for the metallic conduit.

6.6.5 In the case of unarmoured cable, an earth continuity conductor shall either be run outside along the cable or should form a separate insulated core of the cable.

6.6.6 3 Ph. power panels and distribution boards shall have 2 distinct earth connections of the size correlated to the incoming cable size. In case of 1 Ph. DB's a single earth connection is adequate. Similarly for 3 Ph and 1 Ph isolating switches there shall be 2 and 1 earth connections respectively, sizes being correlated to the incoming cable.

6.6.7 Utilising Equipment

3 Ph.motors and other 3 Ph apparatus shall have 2 distinct earth connections of size equal to 50% of the connecting cable subject to the following:

	Copper	Alluminim	Galvanised Steel
Minimum (sqmm)	6.5	10	20
Maximum (sqmm)	65	100	200

6.6.8 For 1 Ph motors and 1 Ph apparatus, the single earth connections shall be provided of the above size. For all light fittings and fans a single earth connection with 2.5 sqmm copper or equivalent size shall be provided.

6.6.9 All street light poles shall have an earth stud and shall be connected to the cable armouring using 6.5 sqmm copper or equivalent unless shown otherwise. For street lighting poles planted in ground, 2.4 meter long 10 SWG bare copper wire shall be coiled and buried with every fourth pole in addition to connection to cable armouring.

6.6.10 An equipment earthing grid is established as shown on the drawings. All earth connections to all panels, DBs and equipment shall be connected to the nearest point of the earthing grid.

6.7 Testing

6.7.1. The following earth resistance values shall be measured with an approved earth meggar and recorded.

1) Each earthing station

- 2) Earthing system as a whole
- 3) Earth continuity conductors

CHAPTER : VII**MV SWITCHGEAR**

7.0 Scope

7.1 The scope of work shall cover the supply, installation, testing and commissioning of all power panels, incorporating, switch fuses, bus bars, and contactor interconnections, earthing etc. meeting the requirements shown in equipment schedule and the drawings.

7.2 Standards

7.2.1 The following standards and rules shall be applicable:

- 1) IS:2516-1972 Specification for AC circuit breakers.
- 2) IS:4047-1977 Specification for Heavy duty air breaker switch gear and fuses for voltage not exceeding 1000 V.
- 3) IS:1818-1972 Specification for AC isolator and earthing switches.
- 4) IS:3072-1975 Code of Practice for installation and maintenance of switch gear.
- 5) IS:3106-1966 Code of Practice for selection, installation and maintenance of fuses (Voltage not exceeding 650 V).
- 6) IS:4237-1967 General requirements for switch gear and control gear for voltage not exceeding 1000 V.
- 7) IS:2607-1976 Air break isolators for Voltages not exceeding 1000 V.
- 8) IS:8623-1977 Specification for factory built assemblies of switch gear and control gear for voltage upto and including 1000 V AC and 1200 V DC.
- 9) Marking and arrangement of switch gear bus bars main connections and auxillary wiring.
- 10) Indian Electricity Act and Rules.

All codes and standards mean the latest. Where not specified otherwise the installation shall generally follow the Indian Standard Codes of Practice or the relevant British Standard Codes of Practice in the absence of corresponding Indian Standards.

7.3 Circuit Breakers

7.3.1 Circuit breakers shall be air break horizontal draw out type fully interlocked and meeting the requirements of IS:2516 or BS:3659. Breakers shall be rated for a medium voltage of 600 V and rated full load amperes as indicated on drawings. Breaker shall be capable of making and breaking system short circuits specified.

7.3.2 Breakers shall be unless specified otherwise manually operated, complete with front-of-the-panel operating handle, isolating plug with safety shutters, mechanical ON/OFF indicator, silver plated arcing and main contacts, are chutes, trip free operating.

Breakers shall be capable of being racked out into 'Testing', 'Isolator' and 'Maintenance' positions and kept locked in any position. Breakers for remote operation shall be motor operated spring charged.

7.4 MCCB's

7.4.1 Moulded case circuit breakers shall be standard products of established manufacturers and shall conform to BS:3871. Breakers shall be rated for system short circuit levels and if unavoidable, backed up by HRC fuses. Breakers shall incorporate thermal and magnetic trips unless shown otherwise in the drawings.

7.5 Switch Fuse Units & Disconnects

7.5.1 Switch fuse units shall have quick make, quick break silver plated preferably double break contacts with operating mechanism suitable for rotary operation in the case of cubicle mounting.

All switches shall be rated according to the equipment schedule or drawings and shall withstand the system prospective fault current let through. Cam operated rotary switches with adequate terminal adopters upto 25A are acceptable but for all higher rating switch fuse units shall be heavy duty type conforming to IS:4047.

7.5.2 Fuses shall be HRC cartridge type conforming to IS:2208 with a breaking capacity corresponding to system fault level. Fuses shall be link type with visible indication. Screw type diazed fuses are not acceptable for any ratings.

7.5.3 All disconnects shall consist of switch units quick make, quick break type with silver plated contacts. The switches shall preferably have double breaks. The switches shall preferably have sheet steel enclosures, which in turn is mounted on suitable angle iron frame work. In wet locations switches shall have cast iron enclosures. Disconnects shall have a minimum breaking capacity of 5KV at 415 Volts.

7.6 Instrument Transformers, Meters & Relays

7.6.1 Ammeters and Voltmeters shall have moving iron spring controlled dead beat elements in square-bezel flush type cases 96mm in size and suitable for switch board mounting. Meters shall conform to BS:89 and have grade 'A' accuracy. Scale ranges shall meet with the requirements or as indicated on the drawing or in the Schedule of quantities.

7.6.2 Electronic energy meters shall be two element switch board mounting type suitable for unbalanced loads. Meters should incorporate a KVA demand meter with an integration time of 30 minutes. In case of two incoming feeders, a summing CT shall be provided with the meter. Meters shall conform to BS:37. The energy meters for DG Set and Transformer shall be calibrated and got certified by the respective Electricity Authority.

7.7 Cubicle Boards

7.7.1 All boards shall be combination of 14 and 16 SWG sheet steel free standing, extensible, totally enclosed, dust tight, vermin proof cubicle, flush dead front and modular construction suitable for 3 phase 415V 4 wire 50 Hertz system. All boards shall be accessible from the front for the maintenance of switch fuses, bus bars, cable terminations, meters etc. Cables shall be capable of entering the board both from top as well as bottom. All panels shall be machine pressed with punched openings for meters etc. All sheet steel shall be rust inhibited through a process of degreasing, acid picking, phosphating etc. The panels shall be finished with two coats of synthetic enamel of approved colour over one coat of red oxide primer. Engraved plastic labels shall be provided indicating the feeder details, and capacity and danger signs.

7.7.2 The boards shall accommodate air insulated bus bars, air circuit breakers, switch fuse units with HRC fuses, starters, necessary meters, relays, contracts etc. as required and arranged in suitable tiers. All breakers and switch fuses shall be suitably derated taking into account specified ambient temperature and ruling temperature inside the cubicle.

7.7.3 The switch board shall be fully compartmentalised in vertical tiers housing the feeder switches in totally enclosed independent compartments. Each compartment shall be self sufficient with switch unit, fuses, contractors, relays, indicating lamps and an inter locked door with facility for padlocking. Each feeder must terminate in an independent labelled terminal block. Strips type terminal block accommodating several feeders together is not acceptable. Pressure clamp type terminals suitable for aluminium wires may be used upto switches of 25A and cable lugs for higher ratings. All terminations shall be shrouded in an approved manner. The entire enclosure shall meet with IS:2147/1962. Feeder connections shall be cut of solid insulated copper/aluminium wires or strips with bimetallic clamps wherever required. Internal wiring, bus bar markings etc. shall conform to IS:375/1963. Internal wiring shall have terminal ferrules. Main switch should be at an easily accessible height and the highest switch operating handle should not be over 1.75m from floor level. Cable glands need not form part of the switch board as the cost of glands will form part of the cable termination.

7.8 Bus Bars

7.8.1 Bus bars shall be three phase and neutral and of copper or aluminium or aluminium alloy as specified and shown on drawings and rated for a temperature specified, based on insulated conductor rating (IS:8084-1976). Neutral bars may be of one half the size of the phase bars.

The main horizontal bus bars shall be of uniform cross section and rated in accord with the incoming switch. The vertical bus bars for the feeder columns may be rated at 75% of aggregate feeder capacity and shall be uniform in size. Bus bars and interconnections shall be taped with PVC colour coded tape to prevent bar-to-bar accidental shorts. Each bus bar shall be directly and easily accessible on removal of the front cover. Bus bars shall be totally enclosed, shrouded and supported

on non-hygroscopic insulator blocks to withstand thermal and dynamic overloads during system short circuits. An earth bus of size 50% of the phase subject to the following maximum and minimum shall be provided. Individual switch components shall be connected with the earth bus through copper or aluminium or galvanized steel strip size as shown. All wire connections to bars shall be through lugs, bolts and nuts and spring washers.

	Copper	Aluminium	Galvanized Steel
	-----	-----	-----
Minimum	6.5 sqmm	10 sqmm	16 sqmm
Maximum	65 sqmm	120 sqmm	200 sqmm

The minimum size of earth bar in a board shall however be 15 x 3 Cu or 25 x 3 Al. or equivalent.

7.9 Isolators

7.9.1 Isolators shall be fixed on wall on self supported angle iron frame work as required and mounted as near to the motor as possible. Where several motors are installed, isolators if required shall be provided at a central location on a common frame work.

7.9.2 Painting, earthing and labels shall be provided as generally indicating for MV switch gear.

7.10 Earthing

7.10.1 All switch panels shall be provided with an earth bar as specified.

7.10.2 Earthing of the switch boards shall be through the equipment earthing system provided in the building with two earth connection as shown.

7.11 Installation

7.11.1 All panels shall be supported on MS channel incorporated in the panel during the fabrication. all such supports shall be prime coated with two finish coats after completion of the work all panels shall be touched up for damaged painting.

7.11.2 All panels shall be megged phase to phase and phase to neutral using a 1000V meggar with all outgoing feeders in closed position. The meggar value should not be less than 2.5 megohms between phases and 1.5 megohms between phases and neutral.

7.11.3 Fabrication drawings of all panels shall be approved by the Consulting Engineers before fabrication.

7.12 Testing & Inspections

7.12.1 All switch boards shall be factory inspected before finishing and dispatch.

7.12.2 Certificate for all routine and type tests for circuit breakers in accordance with the IS:2516-1963 shall be finished. In addition, all panels shall be megged phase to phase and phase to neutral, using a 1000V meggar with all switch gear in closed position. The meggar value should not be less than 2.5 megohms between phases and 1.5 megohms between phase and neutral.

7.12.3 All meters shall be calibrated and tested through secondary injection tests.

7.12.4 All field tests shall be witnessed by Consultants and recorded.

TECHNICAL SPECIFICATIONS FOR AIR-CONDITIONING WORK

A.	SPECIAL REQUIREMENTS OF CONTRACT
A.01	General
A.01.01	These special requirements are intended to amplify the General Conditions of Contract and shall be read in conjunction with them. In case of any discrepancy between the General Conditions of Contract and these special requirements, the most stringent shall apply.
A.02	Scope of Work
A.02.01	The Scope of Work shall include supplying, installing, testing and commissioning of air conditioning systems as described in the Tender Drawings, the Technical Specifications and the Schedule of Quantities. The contractor shall carry out and complete in every respect all work under this contract in conformity with the contract documents and to the entire satisfaction of the Owner.
A.02.02	All items of work shall be executed strictly to fulfil the requirements laid down under the tender. The type of equipment, material specifications, method of installation and testing and type of controls shall be in accordance with the Technical Specifications, the approved shop drawings and the relevant Indian Standards.
A.02.03	The Scope of Work shall include all materials, labour, equipment, appliances and incidental work, whether specifically mentioned or not, but are necessary and customary to make a complete installation. It shall include all fittings, accessories, hardware, foundation bolts, terminal lugs, cable glands, junction boxes and other items, whether specifically mentioned or not, but are useful and necessary for proper and efficient working of the equipment.
A.02.04	The Scope of Work shall broadly include the following:
A.02.04.01	Ducted Split Air Conditioning Units
A.02.04.02	Hi-Wall Mounted Split Air Conditioning Units
A.02.04.03	Sheet Metal Work
A.02.04.04	Thermal and Acoustic Insulation Work
A.02.04.05	Electrical & AC works
A.02.04.06	Drain Piping
A.02.04.07	Vibration Isolation and Sound Attenuation.
A.02.04.08	Surface Painting.
A.02.04.09	Commissioning, Balancing and Performance Testing.
A.02.04.10	Shop Drawings Before Installation and As Built Drawings After Installation.
A.02.04.11	Test Reports, Lists of Spares and Operation and Maintenance Manuals.
A.02.04.12	On Site Training of Owner's Personnel.
A.02.04.13	Maintenance During Defects Liability Period.
A.03	Site Visit Before Bidding
A.03.01	The bidder shall visit site to study the site conditions and availability of resources at site before submitting the bid.
A.04	Performance Guarantee
A.04.01	The contractor shall guarantee the performance of all equipment and the efficiency of the air conditioning systems as a whole to achieve the desired results. The capacities of the equipment are suggested by the HVAC Consultants based on the building orientation and the available constructional details. However the bidders are advised to visit site to ascertain them and confirm that the capacities are adequate.
A.04.02	The contractor shall guarantee that the individual equipment power consumption shall not exceed the ratings furnished by him under the Technical Data to be Submitted with the Tender. If the actual power consumption exceeds the ratings furnished by him under the Technical Data to be Submitted with the Tender, then the Owner shall levy a penalty for the excess power consumed.
A.05	Vibration Isolation and Sound Attenuation
A.05.01	The equipment shall operate under all conditions of load without any objectionable vibration and noise. The contractor shall take the necessary precautions for vibration isolation and sound attenuation.
A.05.02	The noise with all equipment operating shall not exceed the following levels:

A.05.02.01	65 dBA in external areas at a distance of 5 m from building line.
A.06	Project Management
A.06.01	The contractor shall have adequate experience of installing equipment of similar type and capacity operated for a minimum period of two years in India.
A.06.02	The contractor shall ensure that the project is planned and executed in a professional manner. The planning, engineering and shop drawing work shall be carried out by an experienced planning and design engineer. The drawings shall clearly show the exact locations, dimensions, levels, etc. of all equipment.
A.06.03	The contractor shall submit for approval a method statement for each activity and the work shall be carried out as per the approved method.
A.06.04	The contractor shall have a full time site supervisor to control all site activities including co-ordination with other disciplines of work at site. He shall ensure high-class quality of workmanship and timely completion of the project. The contractor shall provide necessary quality assurance personnel.
A.07	Shop Drawings Before Installation and As-Built Drawings After Installation
A.07.01	The contractor shall prepare and submit for approval his shop drawings based on actual measurement at site. The shop drawings shall broadly cover the following drawings:
A.07.01.01	Equipment Layout giving complete details of all equipment.
A.07.01.02	Duct Layout showing all sizes, air quantities, air outlet/ intake details, damper locations and fabrication and support details.
A.07.01.03	Refrigerant and drain pipe layout showing all sizes, locations and fabrication and support details.
A.07.01.04	Electrical drawings showing schematic control and power wiring diagrams, cable sizes, switch details, fuse sizes, control components and wiring details.
A.07.01.05	Civil foundation details for all equipment.
A.07.02	The contractor shall verify adequacy of sizes of shafts, openings, clearances, etc. and shall co-ordinate with other contractors. Anomaly, if any, may be brought to the notice of the Engineer – in – Charge. He shall also co-ordinate his layouts with other disciplines of work.
A.07.03	After the completion of installation, the contractor shall prepare as-built drawings incorporating all the changes made in locations, routing, dimensions, levels, etc. during execution of the project.
A.08	Surface Painting
A.08.01	All equipment shall be factory finished with epoxy paint before despatch. If the shop paint gets damaged or marred during shipment and installation, the affected surface shall be cleaned with mineral spirit, wire brushed, spot primed and then coated with epoxy paint to match the finish over the adjoining shop painted surfaces.
A.09	Commissioning, Balancing and Performance Testing
A.09.01	The commissioning of the air conditioning systems shall be carried out under the supervision of an experienced commissioning engineer.
A.09.02	The air conditioning systems shall be tested for their performance during peak summer and monsoon. The performance test shall be for eight hours on six consecutive days in each season. All tests shall be carried out in the presence of the Owner's representative.
A.09.03	The contractor shall rectify at his cost any defects in materials and/ or workmanship detected in the course of performance testing. The installation shall be tested again after the defects are rectified.
A.10	Test Reports
A.10.01	The results of the performance tests during summer and monsoon shall be submitted for scrutiny and approval. The test reports shall include record of all safety and automatic control settings for the entire installation.
A.10.02	The contractor shall also submit along with the test reports, the manufacturers' certified performance data/ curves for all equipment highlighting the operational parameters for the project.
A.11	Operation and Maintenance Manuals
A.11.01	On completion of the work but before handing over the air conditioning systems to the Owner, the contractor shall submit three ring-bound copies of operation and maintenance manual. The manual shall include following:
A.11.01.01	A list of all equipment giving full details such as model numbers, part numbers, serial numbers, names and addresses of the manufacturers, etc.
A.11.01.02	Start up operation and maintenance instructions for the entire installation.

A.11.01.03	Step-by-step routine, periodical and breakdown maintenance procedure for all equipment.
A.11.01.04	Exploded view of all equipment detailing spare parts.
A.12	Availability of Spares and Services During the Life of the Machines
A.12.01	The contractor shall furnish an undertaking that he shall make available all spares, consumables and services required for proper operation and maintenance of the air conditioning systems for a minimum period of 10 years.
A.13	On Site Training of Owner's Personnel
A.13.01	On completion of the work but before handing over the air conditioning systems to the Owner, the contractor shall train the Owner's operation and maintenance staff to operate, adjust and maintain all equipment installed.
A.14	Completion Period
A.14.01	The entire work covered under this contract shall be completed within three months from the date of the Letter of Award. If the work is delayed due to any cause over which the contractor has no control, then the Owner may, at the request of the contractor and in consultation with the Consultants, extend the completion period by a reasonable time.
A.15	Warranty
A.15.01	The air conditioning systems shall carry a warranty for twelve months from the date of handing them over to the Owner against any defective materials, unsuitable product design and bad workmanship. Any shortcomings found during this warranty period shall be made good and defective materials shall be repaired/ replaced at site free of cost.
A.16	Maintenance During Defects Liability Period
A.16.01	The contractor shall receive service calls for any and all problems experienced in the operation of the air conditioning systems during defects liability period, which shall extend to twelve months from the date of handing over the installation to the Owner.
A.16.02	The contractor shall attend to these calls within 24 hours of receiving the complaints and take immediate steps to correct any deficiencies that may exist.

B.	SYSTEM DESCRIPTION
B.01	General
B.01.01	Proposed air-conditioning works at State Bank of India, Piploda Branch, Region Ratlam, AO BHOPAL . .
B.02	Air Conditioning System
B.02.01	It is proposed to air condition the working areas with split and cassette air conditioning systems. The areas to be air conditioned are main hall, counters and working areas, cabins and system rooms, cabins, partitioned office, UPS and systems rooms on the first floor. The air conditioning systems shall be provided for maintaining comfortable inside temperature of 24°C and less than 60% RH.
B.02.02	The Bank shall have ____ nos. of ____ units of about ____ TR capacities each.
B.02.03	The conditioned air from the ducted split air conditioning units shall be carried through suitable supply air ducts and supply air diffusers to the respective areas to be air conditioned. The return air shall be carried back to the ducted split air conditioning units through suitable return air diffusers and false ceiling void acting as return air plenum.
B.02.04	The condensed water from the split air conditioning units shall be carried through suitable drain water pipe work and discharged outside the building at ground level.
B.02.05	All supply air diffusers shall have volume control dampers to control the airflow through them.
B.02.06	The supply air sheet metal duct work shall have thermal insulation to reduce heat gain. The initial portions of the supply air ducts shall have acoustic insulation to reduce noise carry over. The roof shall have insulation underneath to reduce heat gain. All insulation exposed to atmosphere shall have weatherproof covering to prevent water ingress.
A.16.03	All equipment requiring repairs shall be immediately serviced and repaired. The contractor shall supply all replacement parts and labour at his cost.

B.02.07	All rotating equipment shall be mounted on vibration isolation pads and all pipe and duct connections to the rotating equipment shall be through flexible connectors to prevent vibrations from being transmitted through the building structure.
C.	SCHEDULE OF DRAWINGS
<u>C.01</u>	The following drawings shall form part of the Tender Documents: Drawing No.
C.01.01	HVAC layout
C.02	The Tender Drawings show the suggested equipment and duct layouts. These drawings are prepared by the Consultants for the guidance of the bidders and to make the intent of the Scope of Work clear. These drawings are not meant to be working drawings.
C.03	The Schedule of Quantities is based on the Tender Drawings. In case of conflict between the Schedule of Quantities and other documents including the Technical Specifications and the Tender Drawings, the most stringent shall apply and the interpretation of the Consultants shall be final, conclusive and binding.
<u>C.04</u>	The contractor shall prepare the following drawings. This list is only indicative and indicates minimum requirement. The contractor shall prepare any other drawing that may be required for proper execution of the work.
C.04.01	Equipment Layout giving complete details of all equipment.
C.04.02	Duct Layout showing all duct sizes, air quantities, air outlet/ intake details, damper locations and fabrication and support details.
C.04.03	Refrigerant and Condensate Drain Pipe Layouts showing all pipe sizes, valve sizes, locations and fabrication and support details.
C.04.04	Electrical drawings showing schematic control and power wiring diagrams, cable sizes, switch details, fuse sizes, control components and wiring details.
C.04.05	Civil foundation details for all equipment.

D.01	Split Air Conditioning Units
<u>D.01.01</u>	The split air conditioning units shall be compact, lightweight design completely factory assembled and tested before despatch. Each unit shall be complete with energy efficient rotary/ scroll compressor(s), direct expansion cooling coil, air cooled condenser, all interconnecting refrigerant piping, starter and control panels with all necessary operating and safety controls, indicating lights, interconnecting wiring, condensate drain piping, etc.
<u>D.01.02</u>	The indoor units shall be ceiling suspended ducted type, hi-wall mounted or ceiling suspended cassette type as shown in the drawings. The outdoor units shall be installed over mild steel base frames/ brackets painted with two coats of red oxide and final coat of enamel and shall be located on the service slabs at the back. They shall be adequately isolated by vibration isolation pads to prevent vibrations being carried over to the building structure.
<u>D.01.03</u>	The split air conditioning units shall be factory tested and charged. The manufacturer shall provide factory test certificate. After the units are properly installed, they shall be field tested to ensure that the units meet the tender requirements. The necessary quantities of refrigerant, oil and other consumables shall be provided during initial testing and commissioning. The manufacturer's factory representative shall be present during initial testing and commissioning at site.
<u>D.01.04</u>	The noise and vibration levels shall also be checked to establish that both are within acceptable limits.
<u>D.02</u>	Sheet Metal Work

D.02.01

All rectangular ducts shall be fabricated out of bright galvanised steel sheets with no watermarks. The galvanised steel sheets shall conform to IS 277. The thickness of sheets shall be as under:

Duct longer side	Sheet thickness
Up to 750 mm	0.63 mm (24 gauge)
751 mm to 1500 mm	0.80 mm (22 gauge)
1501 mm to 2250 mm	1.00 mm (20 gauge)
2251 mm and above	1.25 mm (18 gauge)

D.02.02 The duct fabrication and installation shall generally conform to IS 655 – 1963 and specifically conform to following:

Longer side	Thickness	Transverse joints	Reinforcement
Up to 400 mm	24 gauge	25 mm pocket slip	Cross bracing
401 to 750 mm	24 gauge	25 mm pocket slip	25x25x3 mm angle at 1200 mm
751 to 1000 mm	22 gauge	Sheet metal flange	25x25x3 mm angle at 1200 mm
1001 to 1500 mm	22 gauge	40x40x3 mm angle	40x40x3 mm angle at 1200 mm
1501 to 2250 mm	20 gauge	50x50x3 mm angle	50x50x3 mm angle at 1200 mm
Above 2250 mm	18 gauge	50x50x6 mm angle	50x50x6 mm angle at 1200 mm

D.02.03 All duct work shall be transversely supported as under:

Below 1800 mm perimeter	40x40x3 mm angle with 10 mm rod
1801 to 2500 mm perimeter	40x40x6 mm angle with 10 mm rod
Over 2500 mm perimeter	50x50x6 mm angle with 10 mm rod

D.02.04 All supports shall be painted with two coats of red oxide and final coat of enamel. Wherever ducts pass through concrete or brickwork, galvanised steel sheet skirting and bitumen applied curb shall be provided around it. All joints shall have 3 mm thick rubber gaskets. All duct work shall be measured on the external surface and shall include all fittings and supports.

D.02.05 All duct dampers shall be multi-blade louver type of robust construction and tight fitting. They shall be fabricated out of 1.6 mm thick bright galvanised steel sheets. The design and method of handling and control shall be suitable for the location and the service required.

All duct dampers shall be provided with suitable linkages, index levers and quadrants as required for their proper operation, control and setting in any desired position. The duct dampers and their operating devices shall be robust, easily operable and accessible through suitable access doors. Each duct damper shall have an indicating device clearly showing its open/ close position and a locking device to keep it in fixed position at all times after air balancing of the entire system.

D.02.06 All air outlets shall be powder coated aluminium diffusers. All supply air diffusers shall be provided with volume control dampers operated from front face by removable keys. All volume

	control dampers shall be of aluminium anodised in matt black finish. All return/ exhaust air grills shall be without volume control dampers.
D.02.07	All duct work shall be tested for air leakage at joints and connections before application of insulation. The entire air distribution system shall be balanced to supply the required air quantities in different rooms and areas to maintain the specified design conditions.
D.03	Insulation
D.03.01	All supply air shall be insulated with aluminium foil faced resin bonded rigid glass fibre of minimum 48 kg/m ³ density set in hot asphalt or any other approved adhesive. The thickness of insulation shall be minimum 25 mm.
D.03.02	All insulation shall be applied on clean surface with 85/40 or 85/25 industrial grade bitumen or any other approved adhesive. All insulation joints shall be filled with insulation material and sealed with aluminium tape to prevent leakage. All insulation shall be measured on the external surface and shall include all accessories.
D.03.03	The effectiveness of the thermal insulation of ducting shall be tested by measuring the temperature rise in the supply air between each evaporating unit and the farthest air outlet. This temperature rise shall not be more than 1° C.
D.02.07	All duct work shall be tested for air leakage at joints and connections before application of insulation. The entire air distribution system shall be balanced to supply the required air quantities in different rooms and areas to maintain the specified design conditions.
E.01	Unless otherwise mentioned in the Technical specifications, the equipment and materials shall conform to the following standards:
E.01.01	IS 3615 – Glossary of terms used in refrigeration and air conditioning
E.01.02	IS 325 – Three phase induction motors
E.01.03	IS 1822 – Motor starters of voltages not exceeding 1000 V
E.01.04	IS 996 – Single phase small AC and universal motors
E.01.05	IS 1239 – Mild steel tubes, tubulars and other wrought steel fittings
E.01.06	IS 3589 – Electrically welded steel pipes for water, gas and sewage
E.01.07	IS 6392 – Steel pipe flanges
E.01.08	IS 778 – Gun metal gate, globe and check valves for general purposes
E.01.09	IS 277 – Galvanised steel sheets
E.01.10	IS 737 – Wrought aluminium and aluminium alloy sheet and strip for general engineering purposes
E.01.11	IS 655 – Metal air ducts
E.01.12	IS 732 – Code of practice for electrical wiring and fittings for buildings
E.01.13	IS 2516 – AC circuit breakers for voltages not exceeding 1000 V
E.01.14	IS 900 – Code of practice for installation and maintenance of induction motors
E.01.15	IS 1248 – Direct acting electrical indicating instruments
E.01.16	IS 4047 – Heavy duty air break switches and composite units of air break switches and fuses for voltages not exceeding 1000 V
E.01.17	IS 8183 – Specification for bonded glass/ mineral wool
E.01.18	IS 660 – Safety code for mechanical engineering
E.01.19	IS 659 – Safety code for air conditioning
E.01.20	IS 5216 – Code for safety procedures and practices in Electrical & AC workss
E.01.21	IS 3016 – Code of practice for fire precautions in welding and cutting operations

G.	PERFORMANCE TESTS
<u>G.01</u>	General
G.01.01	After installation, initial testing and successful commissioning of all equipment as per the Technical Specifications, the performance tests shall be carried out to establish the equipment ratings.
G.01.02	All equipment capacities shall be computed from temperature/ pressure readings and air flow measurements, whereas power consumption shall be computed from voltage, current and power factor measurements.
G.01.03	The contractor shall arrange at his cost all instruments required for the performance tests. They

	shall be properly calibrated, and the calibration certificates shall be furnished to the HVAC Consultants for approval before starting the performance tests.
G.01.04	The computed results shall tally with the capacity and power consumption figures furnished in the tender. All equipment shall be guaranteed for specified ratings with + 3% tolerance.
G.01.05	The performance tests shall be carried out during peak summer and monsoon. The performance test shall be for ten hours on seven consecutive days in each season. All tests shall be carried out in the presence of the Owner's representative.
G.01.06	All safety and control instruments shall be checked for proper operation. At least four sets of readings shall be taken on each day and for each item. The test readings shall be acceptable only if steady conditions of temperature/ pressure, water flow rates and voltage, current and power factor prevail for at least 15 minutes before taking each set of readings.
G.01.07	The test readings and the computed test results shall be properly recorded and furnished to the Consultants for approval.
H.01	General
H.01.01	The bidder shall furnish complete information about all equipment and materials offered. The tender shall be accompanied by two sets of technical literature giving full description of equipment and materials offered including but not limited to EER, cooling capacity, air flow rate, motor rating, insulation material, etc. The model numbers, if any, of the equipment offered shall be clearly marked on the technical literature.
I.	SCHEDULE OF TECHNICAL DEVIATIONS
	The bidder shall furnish below a schedule of technical deviations giving reasons and price implication, if any. If there is no deviation, the bidder shall explicitly mention that there is no deviation. If this schedule is left blank, the offer shall be presumed to be in conformity with the Tender Specifications.
Clause No.	Technical Deviation and Reason
	Price Implication (Rs.)

APPROVED MAKE OF MATERIAL FOR ELECTRICAL WORK		
S.No	Description of Items	Make of Material
1	Modular type 6/16/32 amp switch, socket, step electronic fan regulator 250 Volt, cover plate, box, bulb holder, 3 pin ceiling rose, TV/Telephone socket with all accessories	Legrand/ Anchor(Roma)/MK/Crabtree
2	MCCB(25 KA) breaking capacity	Legrand/Hager/Siemens/Schneider
3	MCCB/ELCB (10 KA) breaking capacity	Legrand/Hager/Siemens/Schneider
4	MS steel/PVC Conduit with accessories	AKG/BEC/NIC/Precision
5	DBs (IP 43)	Legrand/Hager/Siemens/Schneider
6	PVC insulated copper wire(FR) 650V/1100Volt grade	Finolex/Havells/RR cable
8	PVC/XLPE insulated Al./Cu. Armoured cable 1100 Volt Grade	Finolex/Havells/RR cable/ C.C.I(Cable Corp. Of India)

9	Telephone wire/cable	Finolex/Delton
10	Data cable, Cat-6 cable, Switch, Jack Panel, Rack, Patch cords, Computer I/Os and other accessories	D-link, Legrand
11	Switch Fuse Unit(SFU)	L&T/ Siemens/Schneider
12	Contactors	L&T/ Siemens/Schneider
13	Meters	L&T/Conserve/Elmeasure
14	Cable Termination	Dowells/Comet
15	Cable Tray	Profab/Metalemmms/Asian Ancillary Corporation
16	Light Fixture	Philips/Wipro/Crompton Greaves/Havells
17	Ceiling Fan/Wall Fan	Orient/Usha/Crompton Greave/Havells
18	Exhaust Fan	Crompton Greave/Almonard/Alstom/Usha/Havells
19	Amplifier/Speakers	Bosch/Ahuja
20	Sensors(Occupancy)	Honeywell(MK)/ Siemens/Johnson control
21	Panel	As per IS standard/ CPRI Tested
APPROVED MAKE OF AIR CONDITIONING WORKS		
	Air Conditioners	Daikin/ Hitachi/ Voltas/Bluestar/ Carrier
	Drain Pipe	Kasta/ Supreme/Astral/Finolex
	Voltage Stabilizer	Microteck, V-Gard
	Timer	Legrad/L&T other eq. ISI make
<p>Note:- All the material to be ISI marked. The material shall be only of the approved make only as specified as above. The Contractor shall submit samples of all the makes as specified in above specified makes and the Bank shall have the power to select any of them. The Bank's decision in this regard shall be binding on the contractor.
